Stockroom assistant sources

Prepared teaching sources dated 30 October 2026. All posts and accounts are invented. They do not describe real vacancies, pay or entry rules.

A1 Role guide

Purpose: Give a broad view of the role.

Checks goods when they arrive. Counts items and puts them in the right place. Reads labels and keeps stock records. The work is in a stock area with shelves and goods. It can mean standing, reaching and moving items with the right aids. In this example, entry starts with basic reading and number skills, then training for the tasks. Pay and hours depend on the post. Next steps may include stock records or guiding a small team.

Limit: A broad guide cannot give the terms of one job.

A2 Sample vacancy

Purpose: Describe one invented post.

One stock site. Check goods, count items and log stock. The post has 35 paid hours a week, on day shifts from Monday to Friday. Gross pay is £26,000–£29,000 a year before deductions. Training is provided for agreed tasks. Ask which aids and training are available. Work includes time on your feet.

Limit: This is one offer. It does not show the terms of all stockroom jobs.

A3 Worker account

Purpose: Show one invented worker’s view.

In a different post, the worker checks stock and helps the team when goods arrive. Some shifts fall at weekends. It can be noisy. They use aids and follow the agreed plan to move items. They like seeing the stock area in order.

Limit: One view does not speak for all workers. It gives no pay range or entry rule.

Reception assistant sources

Prepared teaching sources dated 30 October 2026. All posts and accounts are invented. They do not describe real vacancies, pay or entry rules.

B1 Role guide

Purpose: Give a broad view of the role.

Greets visitors, checks bookings, answers messages and passes questions to the right person. Keeps clear records. The work is at a front desk or in a shared office. It may mix sitting and standing. Busy times mean switching tasks. In this example, entry starts with clear speech, reading and basic digital skills, then training for the system. Next steps may include admin tasks or guiding a desk team.

Limit: This guide cannot give the terms of one job. Pay and hours depend on the post.

B2 Sample vacancy

Purpose: Describe one invented post.

One front desk. Greet visitors, check bookings and pass on messages. The post has 35 paid hours a week, in the day from Monday to Friday. Gross pay is £25,000–£28,000 a year before deductions. Training is provided for agreed tasks. The worker can use a seat at the desk and may stand to greet people.

Limit: This is one offer. It gives no exact start time or promise of a next role.

B3 Worker account

Purpose: Show one invented worker’s view.

In a different post, the worker covers some evenings. They greet visitors and check bookings. They enjoy helping people. Busy times can bring several questions at once. They ask the team for help when needed. Some of the work involves keeping records up to date.

Limit: One view does not speak for all workers. It gives no pay range or entry rule.

A model and your research

A note from two cards

A2 gives one stockroom post: 35 paid hours a week, in the day from Monday to Friday. A1 adds a possible next step in stock records or guiding a team. I still need the exact shift start time.

The note uses A2 and A1 for different details. It does not claim all stockroom jobs are the same.

Your task in your book

Research stockroom assistant and reception assistant. Use at least two cards for each. Start with A1/A2 and B1/B2. A3/B3 add another view.

Use these headings: duties; hours; salary range; place of work; entry; next steps; work conditions. Add a card label to each point. Write “not stated” for a real gap.

Give one similarity and one important difference. Back each with card labels. Keep one unanswered question for each job. Say what source could help answer it next.

A source check

What is its label and date? Is it a guide, one vacancy or one account? What is its purpose? What can it tell me? What does it leave out? Does another card add to it?

A date alone does not prove a claim. Different examples may have different hours. Check the post you mean.

Read, point, speak, write, type or use a scribe. Plan in any language. Keep your first view and any change.

Floor choices and short frames

Keep the cards in view. An adult can read them. Use both jobs and at least two card labels for each.

Check	Choices
Two sources for each job	A: A1 and A2; B1 and B2. B: A2 alone; B2 alone.
What is shared in A2 and B2?	A: Both sample posts have 35 paid hours a week. B: Both are the same job.
What differs in A1 and B1?	A: Stock work handles goods; reception work greets visitors. B: The tasks are all the same.
A2 and A3 have different shifts	A: Every stock job is the same. B: Check the hours of the post you mean.
A question for stockroom work	A: What exact time does this shift start? B: Is the role in A2 stockroom work?
A question for reception work	A: Does B2 show a pay range? B: What training does this post provide?

Words to help

“Card ... says ... . Card ... adds ... .”

“Both ... . One difference is ... . The cards are ... .”

“I still need to ask ... . I could check ... next.”

Use the seven profile headings in your book or with a scribe. Record fields you have not yet shown. No public answer is needed.

Adult key for the choices

Keep this page apart from first choices. Record the learner’s own answers before giving the key.

Check	Answer and reason
Sources	A: Two labelled cards for each job.
Similarity	A: Both sample vacancies state 35 paid hours.
Difference	A: A1 focuses on goods; B1 focuses on visitors and bookings.
Different shifts	B: Different posts can have different hours.
Stockroom question	A: A2 gives day shifts but no exact start time.
Reception question	B: B2 says training is provided but gives no content or length.

Use card labels with the choice. Floor key A, A, A, B, A, B. The choices do not cover all seven profile fields. Retain what the learner actually researched, then prompt missing fields without claiming them as independent.

A learner may ask a different useful question if the cards leave it open. Do not mark a question wrong just because it is absent from the key. A question already answered by a card is a cue to check that card again.
