Cases A and B

Invented teaching cases prepared 30 October 2026. These examples do not describe real jobs or rules for all workplaces.

Case A Small bakery

Type or status: Small business. Employee. Pattern: Fixed hours on site.

The worker helps prepare and pack bread in a small team. Work is at the bakery. The agreed shifts start early on the same weekdays.

Flexibility: A change of shift needs agreement with the manager. Fixed hours help with planning, but an early start may not suit everyone.

Support: A team member shows the tasks and checks work. In a small team, fewer people may be free to help at once.

Security: Weekly hours are agreed in this example. The card does not say how long the job lasts.

Question: What are the exact start times and the contract terms?

Case B Hospital ward

Type or status: Public sector in this example. Employee. Pattern: Shifts on site.

The worker checks and puts away ward supplies with the team. No care task is part of this example. Work is on the ward. A rota includes different day and evening shifts, and some weekends.

Flexibility: The rota is shared ahead of time. A shift swap needs agreement so the team has cover.

Support: The worker has task training and a lead to ask on each shift. Busy times may affect when help is available.

Security: Hours are agreed, but contract length is not stated. A public sector label alone does not prove a job is secure.

Question: How far ahead is the rota shared, and what cover is available?

Cases C and D

Invented teaching cases prepared 30 October 2026. These examples do not describe real jobs or rules for all workplaces.

Case C Warehouse planning role

Type or status: Large employer. Employee. Pattern: Hybrid weekday work.

The worker plans orders and keeps records for a warehouse. Moving goods still happens on site. This planning role has two days in the warehouse office and three at an agreed remote workspace each week, after training.

Flexibility: Weekday hours are agreed. The work location varies on planned days; it is not a choice to work at any time.

Support: The team has check-ins and a contact for help. Remote work needs suitable kit, a connection and a space to work.

Security: Weekly hours are agreed. Contract length is not stated. A large employer does not guarantee a lasting job.

Question: Who provides the kit, and how can I get help on a remote day?

Case D Self employed repair worker

Type or status: Own small business. Self-employed. Pattern: Work booked with customers.

The worker books simple repair tasks, does the agreed work and keeps job records. Work takes place at customer sites. Times are agreed for each booking.

Flexibility: The worker can suggest times, but customers and the work also affect the plan. Admin takes time too.

Support: The worker arranges training and can seek help from other skilled workers. There is no team lead supplied by an employer in this case.

Security: Bookings can change, so work and income can vary. Costs and time between jobs matter. No amount of future work is promised.

Question: How steady are bookings, and what help can I arrange?

A model and your comparison

A practice reason

For this example, I value knowing my work days ahead. A has the same agreed weekdays. This could help me plan. An early start may not suit me, so I would ask the exact times.

B has a rota with changing shifts. C has agreed weekday hours and a planned mix of work places. D agrees times for each booking. These features may fit different needs.

Your task in your book

Choose at least three cases from A–D. Use the same headings: time and place; flexibility; support; security or a question. Keep the card label beside each point.

Name a preference, a feature that may fit and why. Add a trade-off or a question you would check. You do not need to make a final career choice.

Preference ideas

I may value set days, varied times, team help, a mix of work places, or more say in bookings. No one feature is best for everyone. More than one case could fit.

You can give your own reason to an adult in private. You may use a practice preference instead. Staff record which kind you used.

Read, point, speak, write, type or use a scribe. Plan in any language. Keep your first view and any change.

Floor choices and short frames

Use A, B and C with the cards in view. An adult may read and record your own choices.

Check	Choices
Three patterns	A: A fixed on site; B shifts on site; C hybrid. B: All three have the same pattern.
A and B	A: Both work at the workplace, but their times differ. B: Both work remotely.
C hybrid work	A: Anyone can choose any hours. B: This role mixes agreed places and keeps agreed hours.
Support	A: The cards describe different kinds of team help. B: Every worker always gets instant help.
Security	A: A type label proves a job will last. B: Check the terms and what is still unknown.
A practice preference for set days	A: A may fit, but check its early starts. B: A is best for everyone.

My reason

“I value ... . Case ... has ... . This could fit because ... .”

“A trade-off is ... . Before choosing, I would ask ... .”

Use the same headings for three cases in your book or with a scribe. A practice choice is not proof of your own preference. You may answer privately.

Adult key for the choices

Keep this page apart from first choices. Record the learner’s answers before giving the key.

Check	Answer and reason
Three patterns	A: Fixed on site, shifts on site and hybrid differ.
A and B	A: Both on site, with different time patterns.
Hybrid	B: C mixes agreed places while keeping agreed hours.
Support	A: Small-team help, shift-team help and remote check-ins differ.
Security	B: The job terms and missing detail matter.
Practice fit	A: Set days may fit; early starts remain a trade-off.

Floor key A, A, B, A, B, A. Ask the learner to point to the card clue. The choices alone do not show the full comparison or a personal preference. Keep any missing fields or supplied answers as partial evidence.

There is no single correct preferred case. A valid reason links a real case feature to the preference used. If a practice preference is used, log hypothetical reasoning; offer a private way to confirm personal fit without pressure.
