Routes, qualifications and progression

Tuesday 1 December 2026 · P3 · 40 minutes · Year A

GROW · up to five learners · Independent is the default

Unit: Identity & Belonging — Belonging in work

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

I can map at least two routes into a chosen career and identify qualifications, experience or skills each requires.

Weekly outcome: Students research entry routes and understand that several routes may lead to the same occupation.

Source: specialist Careers scheme, GROW Careers physical row 13, Autumn 2 row 5. E13 weekly outcome; F13 focus; G13 exact outcome; H13 sequence; I13 timing; J13 evidence; K13 access; L13 support; M13 end check; N13 formative.

Question and success checks

How could two routes lead to the same career?

1. Map two distinct routes to one chosen career in order. 2. Identify qualifications, experience or skills needed for each, using card clues. 3. Label what is needed at entry, learned during training or still to check. A later move is an added progression check.

Prepare

Books, pens, prepared route cards A1/A2 and B1/B2, vocabulary mat and normal reading or typing aids. Keep the adult key apart from first responses. No web, login or pupil phone is needed.

Source adaptation

Named information services, providers and qualification labels in the raw scheme are replaced by prepared generic route guides. Broad college and apprenticeship routes for baker and admin assistant were checked during preparation. The cards do not invent exact entry grades, course places or admission guarantees. Learners choose one career for the task without committing to it as a future job. Source progression and lateral moves remain included.

Where this leads

This helps me see more than one next step towards work and ask what I need to learn or check.

Forty minute teaching sequence

Phase	Min	Teaching and evidence
Retrieval	5	Recall a work feature and a question from Week 4. Fallback: people can reach the same job in different ways.
Explicit input	7	Explain route, qualification, experience and skill. Model A1 in order. Separate entry needs from skills learned. Check the card label, date and limits.
Guided analysis	10	Compare A1 and A2 to the same baker destination. Use the main hinge, re-model if needed and use the parallel hinge. Identify one later step and a sideways move.
Independent application	13	Choose baker or admin assistant. Map both matching cards to that career. Add requirements to each branch, label entry/developed/check and keep one question. Feedback and prompt fade.
Reflection	5	Explain two routes and a key requirement for each. Check source clues and sequence. Retain map, support and revision in the Careers Portfolio/action plan.

5 + 7 + 10 + 13 + 5 = 40 minutes. Checks, feedback, processing and access pauses sit within these phases. Slide 11 is an access reference; slide 12 is hidden for staff.

Worked example and fade

Model A1: School; a bakery or catering course; apply for trainee bakery work; build skills as a baker. Measuring and food safety develop during study and work. Course entry qualifications and level need checking. Course completion does not guarantee a job. Point to the A1 label and its entry, learning and experience lines.

Fade: keep the headings, then let learners build A2 and find its requirements. Remove the completed model before independent mapping where secure. Retain normal reader/scribe access. A copied branch alone is not evidence of independent understanding.

Check after explicit input

Is a skill learned during the course always needed before entry? Expected no. Does a course offer guarantee a job? Expected no. Ask the learner to show which card line supports each answer. Re-model entry, learning and the later job application if unclear.

Routes and planned access

Independent

Choose baker or admin assistant and use its two cards. Map two distinct routes in order to the same career. Identify a qualification, experience or skill each route requires and mark entry, developed or check. Add a possible later step or sideways move and a purposeful question. Use labels beside claims and explain one difference.

Supported

Read one card and one field at a time. Offer two route headings and a shared career destination. Use a separate model, vocabulary and short prompts. Rehearse privately and retain at least two routes with a requirement for each as the target. Fade answer prompts where secure.

Floor

Use A1/A2 and the short choices. Read aloud or scribe the learner's own selections. Order both routes and add a requirement to each. Choices alone do not prove a complete map. Record missing elements or supplied answers as partial evidence.

Cognition and Learning

Explicit instruction, a separate worked model and guided practice. Chunk by route and stage. Use the same entry, learning and next-step headings. Give extra processing time and return to the card clue.

Communication and Interaction

Pre-teach route, qualification, apprenticeship and experience. Use private rehearsal and short frames. Accept speech, pointing, reader, scribe or typing. No cold calling or forced pair work.

SEMH

Keep a predictable sequence, choice of career and private feedback. A task choice is not a final career commitment. No personal grades, family work or income disclosure required. Offer a regulation break and a clear return point.

Sensory and Physical

Clear print, one-card view and normal aids. Allow pointing or spoken ordering before recording. Do not infer access to a route from a diagnosis or support need; identify support questions instead.

EAL

Plan in any language. Explain route as a sequence of steps. Model entry versus learning with simple examples. Rehearse privately, then record the learner's reasoning with normal language support.

Record usual access separately from prompts that supply an answer. Keep normal aids while answer scaffolds fade. Use the source routes Independent / Supported / Floor.

Staff prompts and checks

Hinge during guided comparison

A1 and A2 both aim at baker. Which statement fits? A: A1 guarantees a job when the course ends. B: A1 needs a later job application; A2 combines work and training. Answer B. Ask for both card clues. If insecure, separate study, application and work, re-model, then use the parallel hinge.

Parallel hinge

B2 says office skills develop during training. Which statement fits? A: Every skill listed must be mastered before entry. B: Check entry needs separately from skills learned on the route. Answer B. Ask for the entry and learning lines. If insecure, retain supported mapping and log the missing distinction.

Speaking frames

F: “My career is ... . First ... . Then ... .” M: “Route ... needs ... . The card says ... . This is for entry / learned / to check.” H: “Both routes can lead to ... , but ... . A later move could be ... if ... .”

TA focus

I do: check sequence and the difference between entry and learning. We do: prompt a card clue, not a preferred answer. Independent: keep the learner’s chosen career, log actual support and fade prompts. Rehearse one question for a later careers conversation.

Prompt ladder

1. Point to the place or instruction. 2. Ask a short question. 3. Rephrase the instruction. 4. Provide a scaffold or choice. 5. Model the first step only, then return the task.

Misconceptions and corrections

“There is one route to each career.” The paired cards show distinct routes to the same destination. “A course or level guarantees a job.” Entry, completion and employment are separate decisions. “All skills are entry requirements.” Some develop during training. “A higher level means a better person or the best route.” Level concerns learning demand, not worth or automatic fit.

Evidence and source end check

J13: Career-route comparison map. M13: Can the student identify two legitimate routes and their key requirements? Keep two ordered routes to the same career and route-specific qualification, experience or skill evidence. Mark exact entry details as unknown where the cards do not give them. Add progression/lateral thinking without treating it as a third compulsory route.

Evidence feedback and boundaries

What this lesson can evidence

Week 5 is formative. Keep two distinct ordered routes to one chosen career, card labels, a qualification/experience/skill requirement for each and the entry/developed/check distinction. Keep first thinking, support and revision. Progression, a lateral move and an open question extend the map; record these separately from the exact core outcome. A list of two route names or two different careers is insufficient.

Response and feedback

Book first. Type instead is an optional equivalent record. Reader, scribe, speech, pointing and typing are normal access. A learner may explain the map privately. Their career choice is for this task and can change.

VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read this back to me; E evidence recorded; R responded. Give one precise next step. R requires Voice and Audience, NS and the learner's response in the same colour, on the same page or usual mode. A private adult may be the audience. Use E only for actual banked evidence.

Portfolio

Retain the route map, source clues, requirement labels, support and revision in the Careers Portfolio/action plan. Offer to the Communication portfolio. Staff confirm any accredited mapping from actual work; no completion inferred. Use the open question as a next research step.

Teaching need next lesson _____ Next research question _____

Boundaries

Broad generic guides checked 30 October 2026. They are not applications, offers or a statement that a learner is eligible. Exact grades, equivalents, age rules, course level, support, places and funding need current individual checks before real action. No named providers, institutions, organisations, places or live addresses. Do not request grades, income or health disclosure. No practical food preparation, external application or account needed.

Calendar and sequence

Year A. Autumn 2 Week 5, 30 November–4 December 2026. Tuesday 1 December, P3, 40 minutes. Week 6 retains mixed formative/summative source marking; Week 7 is assessing. Weeks 6–7 follow in order, one return after each Downloaded.
