Staff answers and route guide

Scope and outcome

Prepared route guides, checked 30 October 2026. These are broad routes, not offers of a course or job. Exact entry rules and places must be checked.

Exact outcome: I can map at least two routes into a chosen career and identify qualifications, experience or skills each requires.

The cards summarise credible broad routes, not fictional admissions criteria. Exact entry grades, equivalent qualifications, age rules and current places are deliberately not specified. Requirements can include skills to develop and demonstrate during training; label them distinctly from entry requirements.

Baker routes

Field	A1 college	A2 apprenticeship
Sequence	School; bakery/catering course; apply for trainee work; develop at work.	School; apply for a place; work plus training; complete training and checks.
Entry	Check course qualifications, English/maths and level.	Employer and programme entry needs vary; check exact requirements.
Learning and qualification	Measuring, recipes and food safety; assessed course qualification, level to check.	Level 2 baker route; baking, measurement, food safety and team skills, with checks.
Experience	Course practice; a placement may help if offered.	Work experience is built into work and training.
Next move	Possible team lead role with experience; possible bakery sales move.	Seek baker work or further training; later leadership needs more skill and experience.

Core difference: A1 includes a job application after course study; A2 combines a job with training. Neither promises a future permanent role. Do not change “may be asked for” to a universal entry requirement.

Admin routes and wider choices

Field	B1 college	B2 apprenticeship
Sequence	School; business/admin course; apply for admin work; develop through work/training.	School; apply for admin apprenticeship; work plus training; complete training/checks.
Entry	Check course entry qualifications, English/maths and level.	Check employer needs and level, qualifications and any skills test.
Learning and qualification	Clear messages, records and office software; assessed course award, level to check.	Level 3 business administration is one route; communication, records, software and planning.
Experience	Course tasks; agreed placement or volunteering may help.	Office experience grows through work tasks and training.
Next move	Possible team lead role or another office team with further learning.	Possible admin role, more training or later team/role move.

Progression and lateral moves

Progression: more advanced training or a team lead role after further development. Lateral move: bakery sales or a different office team using related skills. These require checking and may need more training. Do not present promotion or a job as automatic.

Wider route context

School may lead to further study at a college or sixth form, work with training or an apprenticeship. Some routes can later lead to higher education. The selected baker/admin routes do not require a degree by default. Do not make a universal level-to-level ladder or imply that all qualifications at a level cover the same subject.

Checks and misconceptions

Retrieval and model

Recall a feature and question from Week 4, without assuming prior completion. Fallback: the same career can have different routes. After A1 model, expected answers: skills can develop during training; a course does not guarantee a job. Ask for the card lines.

Main hinge

B is correct. A1 includes later application for bakery work; A2 combines work and training. Re-model stage and application if needed. Then use the parallel hinge.

Parallel hinge

B is correct. Entry needs and skills developed during B2 are separate. Ask for one example of each or an entry detail to check. Keep supported work if the distinction remains insecure.

Misconceptions

One career can have several routes. Route type and qualification level are different ideas. Level is not a ranking of people or a guarantee of suitability. Courses, apprenticeships and jobs have distinct entry and completion decisions. “Useful experience” is not automatically a compulsory entry condition. Unknown grades must stay unknown.

Supported and Floor

Floor key A, A, B, A, B, A. Ask for two ordered branches and a requirement for each beyond the choices. Learners can choose a career simply for this task. No personal grades or fixed ambition is needed. Record supplied answers separately from reading/scribing.

Safe discussion

Use unnamed generic types and prepared cards. No real application or contact is made. Do not steer learners away from a route because of diagnosis or support needs. Rehearse questions about access and support privately, without health or family disclosure.

Evidence and feedback guide

Core evidence

J13 calls for a career-route comparison map. G13 requires at least two routes to one chosen career and qualifications, experience or skills each requires. M13 checks two legitimate routes and key requirements. Keep card labels, ordered steps and at least one accurate requirement per route, showing whether it is at entry, developed or still to check. A question alone does not replace a known skill requirement.

Secure and partial evidence

Secure example: “I chose baker. A1: school, bakery course, apply for trainee work, develop as a baker. I learn measurement and food safety; entry grades need checking. A2: apply for an apprenticeship, work plus training, complete checks. It develops baking and team skills at Level 2.” A later team lead role requires more skill and experience.

Partial: two labels without steps; routes to different careers; only one route; no requirement for one branch; a copied model; or made-up entry grades. Added progression and lateral moves extend the map, but do not replace the two core routes.

Precise next steps

“Keep the same career at the end of both routes.” “Put the steps in order.” “Add a skill needed on the second route.” “Separate entry needs from what you learn.” Set one next step and keep the response.

Access and independence

Normal reader, scribe, typing or aids do not by themselves reduce independence of thought. Log actual answer prompts, then fade where secure. Accept a private explanation or ordered pointing with a scribed record.

Portfolio and marking

Retain map, labels, requirements, actual support and revision in the Careers Portfolio/action plan. Offer to the Communication portfolio. VF verbal feedback; WS supported; I independent; NS next step; // self-edit; ? read back; E actual banked evidence; R after Voice, Audience, NS and response in the same colour, on the same page or usual mode.

Fidelity boundary

Exact G13 outcome, I13 sequence and K13 routes retained. Prepared generic cards replace named/live sources in H13 at the owner’s direction. Progression and lateral moves retained. Week 5 formative; Week 6 mixed source marking; Week 7 assessing.
