

Arrival choices

Previous lesson reminder:

Start with 1 and 2. Try 3 and 4 when ready. Reading and exact scribing are available.

1 What area does a four-figure reference locate?

Support: Use the reminder strip or talk it through with an adult.

My response

2 Which meaning fits settlement?

Support: Choose: A place where people live OR Growth in the share of people living in urban places.

My response

3 What does a GIS layer do?

Support: Use the model evidence anchor A or read one relevant card together.

My response

4 Can building outlines alone establish population density?

Support: Give a reason when ready.

My response

Stretch: use a precise example or explain which detail supports your answer.

Evidence cards

Read, point or listen. Keep the source label with any detail you use.

A Local reference points

The Middlesbrough railway station and the Transporter Bridge are reference points on our digital map. Toggle layers to examine their positions. Town Hall lies beyond this map's southern boundary.

Source: OpenStreetMap place references; approximate labelled coordinates

Limit: These points alone cannot show population density or prove why development happened.

B Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

Source: Authored geographical explanation

Limit: A reason is a hypothesis until tested against evidence for a particular place.

C Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your dated observations for the fieldwork enquiry.

Source: Authored classroom case

Limit: This example does not describe every person or place.

D Contrasting reference place

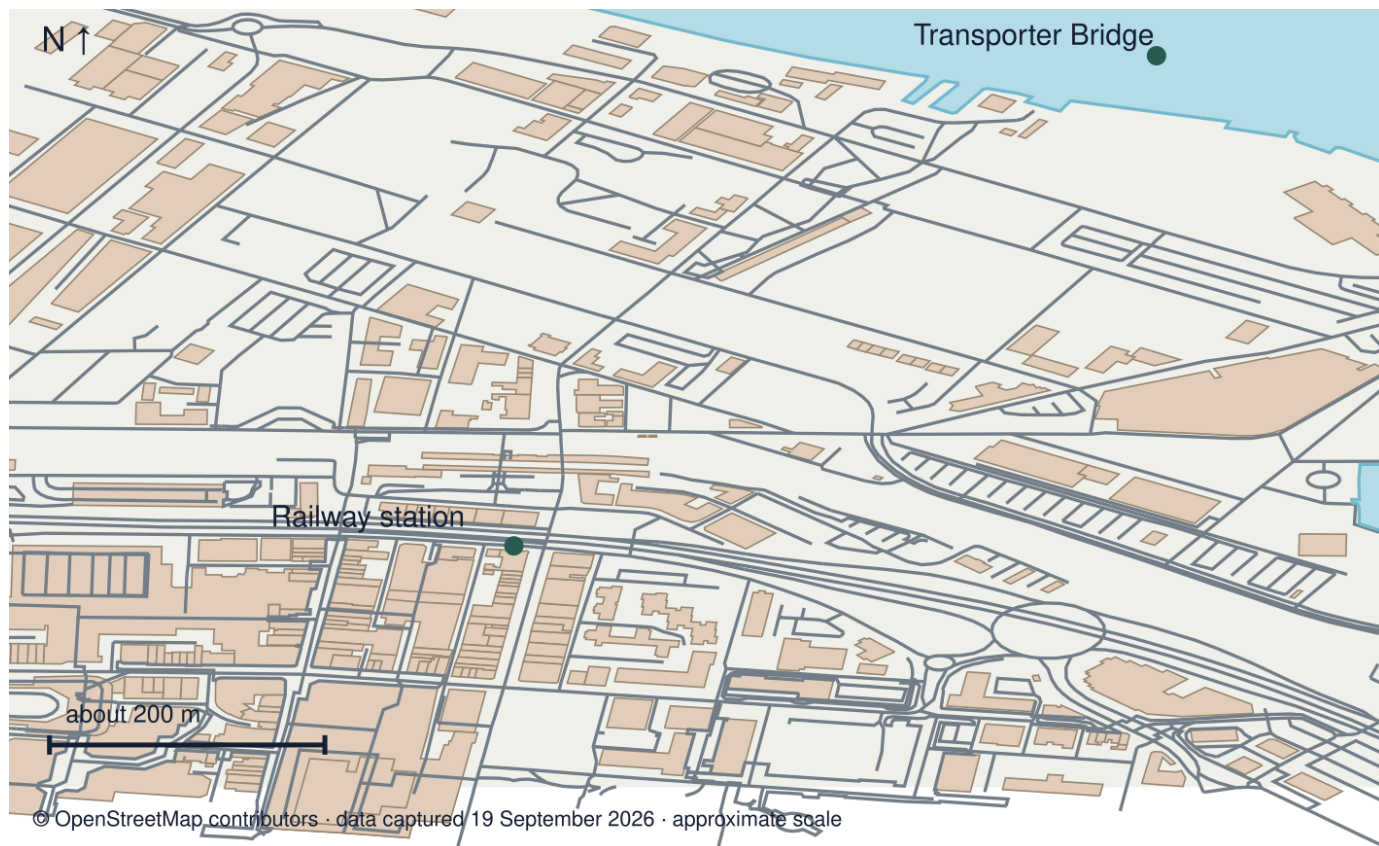

Compare a small centre such as Helmsley with central Middlesbrough at comparable map scales. Record the area, source and date used.

Source: OpenStreetMap linked views

Limit: One sampled street does not represent a whole settlement.

Visual resource

Use this visual with the evidence cards and enquiry questions.

Source: © OpenStreetMap contributors, data captured 19 September 2026, approximate scale. Map references recorded in Sources and checks.

A detail I noticed and what it helps me explain

Shared investigation

1. Toggle road, building and place layers on the supplied local map.

2. Compare what becomes visible and what remains uncertain.

Work with a partner or adult, or use your own table. One person suggests; the other checks the evidence. Swap after one turn. Passing is allowed.

Use the evidence cards and any visual sheet. Follow the two shared steps above, then record one decision.

Our explanation

Support: Use the glossary and one chunk of evidence. Plan the claim and supporting detail before explaining.

Further challenge: Explain how scale, incomplete data or a missing layer could change your interpretation.

Supported independent task

Complete this route only. Use digital mapping or GIS to describe a place.

1. Capture or print an annotated map with at least two layers.
2. Locate two features and describe a spatial pattern.
3. Answer an independent question about what the map cannot establish.

Support: Use the glossary and one chunk of evidence. Plan the claim and supporting detail before explaining. Complete the organiser one space at a time. With the ____ layer on, I notice _____. This suggests _____. The map cannot show _____.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

An adult may read or scribe your exact response. They should not choose the answer.

Standard independent task

Complete this route only. Use digital mapping or GIS to describe a place.

1. Capture or print an annotated map with at least two layers.
2. Locate two features and describe a spatial pattern.
3. Answer an independent question about what the map cannot establish.

Support: With the ____ layer on, I notice _____. This suggests _____. The map cannot show _____.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

Check the required evidence and revise one detail.

Stretch independent task

Complete this route only. Use digital mapping or GIS to describe a place.

1. Capture or print an annotated map with at least two layers.
2. Locate two features and describe a spatial pattern.
3. Answer an independent question about what the map cannot establish.
4. Explain how scale, incomplete data or a missing layer could change your interpretation.

Support: Choose the evidence independently. Use the frame only if it helps.

Places and symbols or grid references

Location or direction statement

Pattern using the map evidence

What this map does not show

Explain how scale, incomplete data or a missing layer could change your interpretation.

Exit ticket

Choose a response mode. You may give your answers privately to an adult.

What does a GIS layer do?

My response

Can building outlines alone establish population density?

My response

Support: With the ____ layer on, I notice _____. This suggests _____. The map cannot show _____.

Further challenge: Explain how scale, incomplete data or a missing layer could change your interpretation.

One thing I changed or want to check
