

Arrival choices

Previous lesson reminder:

Start with 1 and 2. Try 3 and 4 when ready. Reading and exact scribing are available.

1 What does a GIS layer do?

Support: Use the reminder strip or talk it through with an adult.

My response

2 Which meaning fits settlement?

Support: Choose: A place where people live OR Growth in the share of people living in urban places.

My response

3 Is adding buildings alone enough to prove national urbanisation?

Support: Use the model evidence anchor B or read one relevant card together.

My response

4 What further evidence would show population change?

Support: Give a reason when ready.

My response

Stretch: use a precise example or explain which detail supports your answer.

Evidence cards

Read, point or listen. Keep the source label with any detail you use.

A Local reference points

The Middlesbrough railway station and the Transporter Bridge are reference points on our digital map. Toggle layers to examine their positions. Town Hall lies beyond this map's southern boundary.

Source: OpenStreetMap place references; approximate labelled coordinates

Limit: These points alone cannot show population density or prove why development happened.

B Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

Source: Authored geographical explanation

Limit: A reason is a hypothesis until tested against evidence for a particular place.

C Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your dated observations for the fieldwork enquiry.

Source: Authored classroom case

Limit: This example does not describe every person or place.

D Contrasting reference place

Compare a small centre such as Helmsley with central Middlesbrough at comparable map scales. Record the area, source and date used.

Source: OpenStreetMap linked views

Limit: One sampled street does not represent a whole settlement.

Visual resource

Use this visual with the evidence cards and enquiry questions.

Source: Natural Earth public-domain outlines, labels simplified. Terms of use:
<https://www.naturalearthdata.com/about/terms-of-use/> (recorded in Sources and checks).

A detail I noticed and what it helps me explain

Shared investigation

1. Sort descriptions of land use, settlement growth and urbanisation.
2. Use practice data to test what a claim actually measures.

Work with a partner or adult, or use your own table. One person suggests; the other checks the evidence. Swap after one turn. Passing is allowed.

Move or match the cards

Cards to use
More jobs attract residents
A street has eight shops
Share living in urban areas rises

Possible labels: Land-use observation / Possible growth explanation / Urbanisation

Our explanation

Support: Use the glossary and one chunk of evidence. Plan the claim and supporting detail before explaining.

Further challenge: Evaluate why a single land-use tally cannot prove urbanisation over time.

Supported independent task

Complete this route only. Explain settlement and urbanisation.

1. Explain how work, transport and services can contribute to settlement growth.
2. Use a diagram and the labelled practice data.
3. Distinguish urban growth from a rising national urban share.

Support: Use the glossary and one chunk of evidence. Plan the claim and supporting detail before explaining. Complete the organiser one space at a time. A place may grow because _____. This can lead to _____. Urbanisation specifically means _____.

My choice or example

A detail from the card story or object

My reason

My check or next step

An adult may read or scribe your exact response. They should not choose the answer.

Standard independent task

Complete this route only. Explain settlement and urbanisation.

1. Explain how work, transport and services can contribute to settlement growth.
2. Use a diagram and the labelled practice data.
3. Distinguish urban growth from a rising national urban share.

Support: A place may grow because _____. This can lead to _____. Urbanisation specifically means _____.

My choice or example

A detail from the card story or object

My reason

My check or next step

Check the required evidence and revise one detail.

Stretch independent task

Complete this route only. Explain settlement and urbanisation.

1. Explain how work, transport and services can contribute to settlement growth.
2. Use a diagram and the labelled practice data.
3. Distinguish urban growth from a rising national urban share.
4. Evaluate why a single land-use tally cannot prove urbanisation over time.

Support: Choose the evidence independently. Use the frame only if it helps.

My choice or example

A detail from the card story or object

My reason

My check or next step

Evaluate why a single land-use tally cannot prove urbanisation over time.

Exit ticket

Choose a response mode. You may give your answers privately to an adult.

Is adding buildings alone enough to prove national urbanisation?

My response

What further evidence would show population change?

My response

Support: A place may grow because _____. This can lead to _____. Urbanisation specifically means _____.

Further challenge: Evaluate why a single land-use tally cannot prove urbanisation over time.

One thing I changed or want to check
