

From fieldwork to spreadsheet and graph

Learning goal: Record fieldwork in a spreadsheet and graph it.

Words to use

Word	Meaning
settlement	A place where people live
urbanisation	Growth in the share of people living in urban places
land use	What land is used for
GIS	Mapping information in separate data layers

Remember

Why is a bar chart suitable for land-use categories? It compares counts across separate categories.

What if fieldwork data are missing? Use clearly labelled practice data for the skill, then collect genuine observations before assessing the fieldwork enquiry.

How to show your learning

Enter your own previous-lesson data into the editable spreadsheet.

The largest category is ____ with _____. Compared with _____, _____. Our sample is limited because _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
