

Comparing places through online evidence

Learning goal: Compare the local area with a contrasting place using online evidence.

Words to use

Word	Meaning
settlement	A place where people live
urbanisation	Growth in the share of people living in urban places
land use	What land is used for
GIS	Mapping information in separate data layers

Remember

Why compare maps at similar scales? It reduces misleading differences caused by showing unequal areas or detail.

Can one street represent a whole town without qualification? No. State the sampled area and limits.

How to show your learning

Create a comparison using online maps of both named places.

Using comparable areas, ____ shows ____ whereas _____. The source is useful for ____ but _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
