

Teacher card

Worldviews and responses to change / GROW_S2_W04

Outcome: Compare how different communities respond to change with an RE link.

Evidence to retain: F: comparison response, questioning and two exit questions.

Forty minute route

Arrival 4 min; starter 3; model 6; shared task 7; check 2; independent 12; review 3; exit 3.
Pause time is flexible.

Preparation

Choose one independent route. Print the evidence and shared cards, required visual or data sheet, route worksheet and exit. The organiser is one separate A4 page. Keep answers with staff.

Use evidence to explain problems and feasible responses. Avoid asking pupils to carry responsibility for solving global climate change.

Access and regulation

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

Use sensitive content warnings where relevant. Do not ask for family details or personal experiences.

Assessment

Use questioning and the exit response to decide the next step. Record the learner's individual contribution and the access support used.

UAS: no approved unit code is supplied. Match the learner's evidence to the centre-selected unit and exact criteria before submission. This pack makes no automatic award claim.

Model and answers

Read these pages before teaching. Hide the model during independent assessment.

Question: Can different stated values lead to caring actions?

Evidence: D Community accounts: Fictional account 1: a faith group explains caring for creation as its reason for planting shade trees. Fictional account 2: a non-religious residents' group gives human wellbeing as its reason for a cool-room project.

Think aloud: Yes. The accounts give different motivations for actions intended to reduce heat harm.

Check: Do these fictional accounts describe all faith or non-religious groups? No. They are authored examples, not representative findings.

Arrival answers

1. Carbon dioxide is added to the atmosphere, strengthening the warming influence.
2. Weather patterns over a long period
3. Yes. The accounts give different motivations for actions intended to reduce heat harm.
4. No. They are authored examples, not representative findings.

Shared activity reasoning

Exit responses

Can different stated values lead to caring actions? Yes. The accounts give different motivations for actions intended to reduce heat harm.

Do these fictional accounts describe all faith or non-religious groups? No. They are authored examples, not representative findings.

Teaching and evidence record

Supplied scheme of work teaching sequence: Compare two carefully selected community accounts, including stated beliefs or values. Build a shared comparison grid; independently explain one similarity or difference without generalising to everyone in a community.

Look for

F: comparison response, questioning and two exit questions.

Accept accurate equivalents, including speech or exact scribing. Check the concept and use of evidence rather than length or handwriting. Record access support separately from content prompting.

BUILD: a concrete example with a reason or demonstrated action. GROW: explain or compare with a relevant detail. LAUNCH: connect evidence and reasoning; use a limitation when the outcome requires it. Keep RE responses non-GCSE.

Media

Original captioned teaching model made for this pack. It demonstrates the supplied reasoning; it is not historical footage, survivor testimony or a documentary. The full transcript and factual source credits are included.

Use manual steps for a calm pace. The silent MP4 has visible captions and a matching text transcript. External archive media is optional and should be previewed before class.
