

Tracking live hazards

Learning goal: Track live hazards online and interpret data.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

Why record the snapshot time? The feed changes, so the evidence must be traceable to a particular capture.

Can this small sample predict the next earthquake? No. A short event list is not a prediction.

How to show your learning

Capture a dated and timed live snapshot or use the explicitly dated archive if offline.

Snapshot UTC _____. Source _____. Variable and units _____. Pattern _____. This cannot tell us _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
