

Hazard effects and management

Learning goal: Explain effects and management of a hazard.

Words to use

Word	Meaning
tectonic	Related to movement of Earth's plates
exposure	People or things in harm's way
vulnerability	Conditions making harm more likely or severe
risk	Potential harm from a hazard in a particular setting

Remember

Which response directly addresses tsunami exposure? Accessible routes and timely warnings that enable movement to higher ground.

Does earthquake-resistant construction remove all tsunami risk? No. Shaking and coastal flooding require different measures.

How to show your learning

Locate the Japan event and build a cause, effects and responses map.

For the risk of ____, I choose ____ because _____. A limitation is _____.

Evidence matters

Fictional cases are teaching examples. Historical, geographical and religious claims use the named sources. A model video demonstrates a method.

You can respond by speaking, pointing, drawing, typing or writing. A fictional personal example is welcome.
