Staff answers and decision rules

GROW Spring 1 Week 1 Monday 4 January 2027 P6 Year A Explore

Examples are adult models. They are never prefilled pupil evidence.

Arrival

The pupil chooses or indicates a form and knows the stop signal and quiet option.

Starter

The pupil notices one change or makes a simple repeat-and-change pattern.

I do

Which is a detail from the description: 'Thomas used rings of colour' or 'Everyone must feel happy'? Expected: rings of colour.

We do

If the pupil cannot explain B, model changing only spacing, then use a parallel hinge: 'A quiet sound idea feels too busy. Would fewer taps and a pause help test the idea?' Continue independently when the pupil identifies a purposeful change.

Create

The pupil makes or directs a first attempt with a clear repeated feature and a deliberate change. The work need not be neat or finished.

Review

The log links an artist detail to a pupil choice and identifies one next test. The adult distinguishes the pupil's words from a staff observation.

Exit

The pupil identifies one feature to retain or change. Materials are put away calmly.

Teacher example

Matisse could move shapes to test a design. I moved my curved marks so the seed seemed to grow upwards. I kept the spaces small at first, then made them wider. Next time I will test fewer marks so the change is clearer.

Artist description answers

GROW Spring 1 Week 1 Monday 4 January 2027 P6 Year A Explore

Henri Matisse - He could change the positions or arrangement of the cut shapes. The artist can try a different position without starting everything again. I see this as one possible example of adapting.

Alma Thomas - A dark blue centre and surrounding rings of colour. The centre is off to one side. We could keep repeating a mark and gradually change its size, spacing or direction. This would be our own response, rather than a copy of the painting.

Stretch evidence

Keep both facts, your view and reason, and your skill goal. Say which card you used. An adult can write your words.

Ask the same prompts orally. Record the pupil's own words and support. Explore success is independent of this optional work.
