Two ideas for resilience teacher and cover plan

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

Teach one 40 minute lesson. Both pathways use Explore. Plan an artwork on the theme of resilience.

Today: I can plan two different ideas and choose one for a reason.

Success criteria

I can make two small rough plans.

I can show how each idea links to resilience.

I can choose one idea and give a reason.

Prepare before pupils arrive

For five pupils: five books or arts logs, five pencils and ten small planning spaces for two rough ideas each. Use a third space only if useful.

Optional visual route: six drawing tools including the adult model, five blank layout areas and a small set of colour tools for planning labels. No paint, cutting or fixing is required this week.

Sound or movement plans: five four-part sequence spaces, or five spoken/witness records. Fingertips and seated actions are enough for a brief planning demonstration.

Adult examples: two or three labelled original rough plans, one selected plan and one materials-and-time plan. These are teacher models, not pupil evidence.

For lesson two retain each pupil's chosen rough plan, reason and any feedback. No recording device or specialist art kit is required.

Set a clear stop signal and quiet option. Offer an invented feeling or abstract theme. Have the prior work or an honest catch-up trial ready for lesson two.

Timing

Arrival 0-3; Starter 3-6; I do 6-12; We do 12-18; Create 18-32; Review 32-37; Exit 37-40 minutes. Tidy in the final two minutes of Review.

Non specialist demonstration

0 to 15 seconds: Say: I can plan a made-up idea. Show a small seed that bends, then grows another way. Label: change direction.

15 to 30 seconds: Show a separate path turning around a block. Say: This is a different subject and layout. Label: find another route.

30 to 45 seconds: Show four silent planned parts: repeat, pause, change, return. Say: A sequence note is a plan too.

45 to 60 seconds: Point to one option. Say: I choose this because it fits my idea and I can make it. I keep the other plan to show my choice.

Arrival and starter

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

Arrival 0 to 3 minutes

Pupil task: Choose visual art, sound or silent movement. Use a made-up idea. You may share privately.

What to say: We are planning an original artwork about resilience. It can show a pause, a new route or help. It does not need a story from your life. Choose visual art, a quiet sound idea or a silent movement idea. You can plan by speaking, drawing, signing or directing me.

What good looks like: The pupil chooses or indicates a form and understands that today's work is planning. An invented or abstract idea is accepted. Quiet and private routes are available.

Materials free fallback: Pupil speaks or directs an adult to describe a four-part sequence. Stillness, silent movement or an adult-scribed plan are valid.

Check and response: There is no preferred art form. The plan should show an intention through a feature or sequence.

Starter 3 to 6 minutes

Pupil task: Think of a seed after wind, a path round a block, or a pattern that returns. Which might show a way forward? Give a reason.

What to say: A seed could bend then grow in a new direction. A path could find a way around a block. A pattern could stop for a gap, then return. These are made-up possibilities, not fixed meanings. Which one gives you an idea, and why? You may choose another idea.

What good looks like: The pupil links a possible subject or abstract feature to finding a way forward. The adult accepts a reasoned different interpretation and does not infer a private feeling.

Materials free fallback: Read the choices aloud. Pupil chooses a spoken option or directs one small gesture. No image or materials are needed.

Check and response: For example: A path around a block could show finding another way. A returning pattern could show starting again after a pause.

Modelling and cover guidance

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

I do 6 to 12 minutes

Pupil task: Watch two genuinely different rough plans. See a picture plan and a short sequence plan. A rough plan is enough today.

What to say: My first rough idea shows a small seed bending, then a tall curve growing another way. My second shows a path turning around a block. They have different subjects and layouts. For sound or movement, I could plan four parts: repeat, pause, change, return. I label what the feature is meant to suggest. These are adult plans, not finished artwork or your evidence.

What good looks like: The adult models two distinct options and a short label linking a feature to resilience. A small sketch, spoken sequence or four-part notation is enough. Pupils see that a plan need not be neat.

Materials free fallback: Describe both ideas aloud or demonstrate the short sequence with small silent gestures. An adult can draw or note the pupil's directed layout.

Check and response: Check: Are the plans different only because one is blue? No. A new subject, layout or sequence creates a real choice. If unclear, compare a seed plan with a path plan and identify one difference.

Store and log

Use the final two minutes of Review for quiet tidy-up. Keep paintings flat to dry, cap wet materials and wipe mats. Sound and movement pupils retain a simple sequence plan or dated adult observation plus their words. Work-only images are optional. Store the actual first attempt and log together.

Cover teacher route

Read the invented idea choices aloud. Model two small, genuinely different rough plans and a selection reason. Pupils retain two options in their chosen form, label their intention and choose one. Use short sequence notes for sound or movement. Do not begin full artwork making. Keep both plans and the arts log for lesson two. Use the seven-stage timing and final two Review minutes for tidy-up.

Guided practice and task

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

We do 12 to 18 minutes

Pupil task: Compare two class plans. Say what is different and what each could suggest. Which one can be made with simple tools or no tools?

What to say: Let us compare an invented seed plan and a returning-pattern plan. What is different? What could each suggest? Hinge: which pair gives a real choice? A the same layout in two colours, B a seed changing direction and a path around a block, or C two copies of the same plan. Explain your choice.

What good looks like: The pupil chooses B and names a difference in subject or arrangement. They can explain a possible resilience link and notice one practical constraint. The adult models one comparison, then returns the choice.

Materials free fallback: Read the options aloud. Pupil may point, sign, speak or direct the adult to outline the two plans in the air.

Check and response: If A or C is chosen, name the repeated layout and model the different subject. Parallel check: Does a four-part pause-and-return sequence offer a different idea from a rising seed drawing? Yes. Continue when the pupil identifies one meaningful difference.

Create 18 to 32 minutes

Pupil task: Make two small rough plans in your chosen form. Use different subjects, layouts or sequences. Add a short note to show what each idea means. Choose one plan and say why.

What to say: Plan two different ideas. Use small thumbnails for a picture, or a short ordered note for sound or movement. Keep the work rough and small. Label the feature that could show resilience. Choose one idea because it fits your intention and can be made with the access, time and materials available. This is a planning session, not the full making.

What good looks like: Two genuine options are retained, each with an intention or resilience link. The pupil selects one for a specific reason. A directed or scribed plan preserves the pupil's decisions. No finished artwork is claimed.

Materials free fallback: Pupil describes two original short sequences or directs an adult to show them. Adult keeps ordered notes and the exact confirmed choice and reason when a recording surface is available.

Check and response: A useful reason links intention and feasibility: I choose the returning pattern because the pause shows a restart and I can make it with silent actions. A third plan is optional if it helps a decision.

Optional progression evidence

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

Optional next level stretch

What to say: If you want the extra task, Compare both plans. Note a strength and a limit of each. Think about time, tools or access. Explain why your choice fits the idea. Say what you will test in the detailed plan.

What good looks like: The pupil weighs intention against a practical constraint, compares real options and gives a reasoned choice without claiming completed making.

Materials free fallback: Adult asks the same prompts orally and retains ordered idea notes with the pupil's confirmed comparison and reason.

Retain: Keep both plans, your comparison, one practical limit and your choice with reasons.

This task is extra. Your Explore work is complete without it. Keep the record in case your next level changes.

Review and evidence

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

Review 32 to 37 minutes

Pupil task: Show your two plans to an adult or partner. Ask what they notice. You choose what to keep. Keep both plans and your reason.

What to say: The listener says one feature they notice, then asks what the maker intends. The maker can keep the choice or revise the reason after considering feedback. You may share with only me. Use the final two minutes to put tools away and store both rough plans for the next lesson.

What good looks like: A pupil-owned decision remains clear after feedback. Both options and the selection reason are retained. Private sharing and an unchanged choice are valid.

Materials free fallback: Adult reads both sequence notes back. Pupil confirms the choice or changes it. Note feedback separately from the pupil's decision.

Check and response: Useful feedback: I notice the path turns around the block. The maker can explain why that matters. Do not require an audience to agree with the interpretation.

Exit 37 to 40 minutes

Pupil task: Arts log: My two ideas were ___. I chose ___ because ___. Next time my plan needs ___.

What to say: Date the real planning work. Record the two ideas, your chosen plan, the feature you want to use and your reason. Add one thing the detailed plan will need next time. You can speak, sign, sketch or direct a scribe, and I will read your words back.

What good looks like: A dated log records actual planning options and the pupil's own selection. The next step concerns developing the plan, not pretending the artwork has been made.

Materials free fallback: Pupil gives an oral or gestured log. Adult retains the two precise idea notes and confirmed reason at the next available recording opportunity.

Check and response: Example only: My ideas were a seed and a returning rhythm. I chose the rhythm because the pause shows a restart. My next plan needs an ending.

Access and teaching decisions

GROW Spring 1 Week 3 Monday 18 January 2027 P6 Year A Explore

Adaptations and prompt ladder

Cognition and Learning: Show one instruction at a time. Model a small test, offer two choices, then fade the prompt. Read the task and skill words aloud when needed.

Communication and Interaction: Allow pointing, signing, speech or an adult scribe. Give processing time. Use I chose ___ because ___. Read scribed words back for correction.

SEMH: Use a fictional feeling or abstract idea. Let pupils choose form and audience. Offer a calm pause and agreed return cue. Public performance and personal disclosure are optional.

Sensory and Physical: Offer silent seated movements, large marks and pupil-directed adult handling. Keep sound below talking volume. Stop on a raised hand. Ask before touching work.

EAL: Plan in any language. Teach words through marks and gestures. Accept a labelled sketch or oral explanation. Check meaning before spelling.

1. Point to the place or instruction.
2. Ask a short question.
3. Rephrase the instruction.
4. Provide a scaffold or choice.
5. Model the first step only, then return the task.

Common mistakes and fixes

Resilience means never pausing or asking for help. - A pause, support or a different route can be part of finding a way forward. Use invented or abstract ideas, not personal hardship.

Two ideas must be almost the same design. - Change the main subject, arrangement or sequence so the plans offer a real choice. Changing only a colour may not make a genuinely different idea.

A plan is a finished artwork. - Keep rough sketches, labels or short sequence notes as plans. The full making happens later. Do not claim completed artwork this week.

A more complex idea is always better. - Choose an idea that communicates an intention and can be made with the time, space, materials and access available. A small original piece can work well.

Feedback

Give one specific success and one next step. VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read this back; E evidence retained; R responded. Use R only when pupil voice and an audience are present, one NS is set, and the pupil responds in the same colour, on the same page or usual mode. A saved image alone is not R.

Where this leads

Artists, designers and performers test ideas and explain their choices. These skills help when working to a brief.
