Staff answers and decision rules

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Examples are adult models. They are never prefilled pupil evidence.

Arrival

An honest fresh plan is valid. Keep the pupil's own intention and choice.

Starter

Useful missing detail: where a path turns, how many marks repeat, when a pause comes, which tools are needed, or how the sequence ends.

I do

Check: Is a list saying make it nice enough? No. A usable plan says what comes first, which resources or no-materials route is used, and how the maker will check and finish.

We do

If A or C is chosen, model the confusion from one missing step. Parallel check: If a silent plan has no ending cue, should we add a clear stop before the making lesson? Yes. Continue when the pupil identifies a useful detail.

Create

A workable simple plan could use one sheet, two colour tools and three ordered steps. A silent plan could use four small seated actions, a raised-hand stop and no art tools. These are options, not compulsory designs.

Review

Useful feedback: I know the four actions but not the ending cue. Useful response: I added a raised-hand stop so the ending is clear.

Exit

Example only: My plan shows finding a new route through a turning path. I need one sheet and two colour tools. I added a turn label because the listener asked where the path changes.

Teacher example

Teacher model only: My plan shows a path finding another route. I labelled the turn, counted one sheet and two colour tools, and put my steps in order. I added a label after feedback. I still need the adult to approve the space.

Teacher model only: My silent piece has four parts: repeat, pause, change, return. I need no art tools. I chose small seated actions and a raised-hand stop. My draft time plan leaves time to practise and tidy.
