My plan ready for making teacher and cover plan

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Teach one 40 minute lesson. Both pathways use Explore. Plan an artwork on the theme of resilience.

Today: I can develop my chosen plan and explain how I will make it.

Success criteria

I can label a layout or ordered sequence.

I can plan materials, access, steps and time.

I can use feedback to check what my plan still needs.

Prepare before pupils arrive

For five pupils: five books or arts logs, five pencils and ten small planning spaces for two rough ideas each. Use a third space only if useful.

Optional visual route: six drawing tools including the adult model, five blank layout areas and a small set of colour tools for planning labels. No paint, cutting or fixing is required this week.

Sound or movement plans: five four-part sequence spaces, or five spoken/witness records. Fingertips and seated actions are enough for a brief planning demonstration.

Adult examples: two or three labelled original rough plans, one selected plan and one materials-and-time plan. These are teacher models, not pupil evidence.

For lesson two retain each pupil's chosen rough plan, reason and any feedback. No recording device or specialist art kit is required.

Set a clear stop signal and quiet option. Offer an invented feeling or abstract theme. Have the prior work or an honest catch-up trial ready for lesson two.

Timing

Arrival 0-3; Starter 3-6; I do 6-12; We do 12-18; Create 18-32; Review 32-37; Exit 37-40 minutes. Tidy in the final two minutes of Review.

Non specialist demonstration

0 to 15 seconds: Point to the chosen rough plan. Say: I keep my idea and add labels so someone can follow it.

15 to 30 seconds: Label start, turn and new route. Say: I need one sheet and two colour tools. A silent sequence needs no art tools.

30 to 45 seconds: Say three ordered making steps. Show the draft forty-minute split: five set-up, twenty making, ten checking and five tidy.

45 to 60 seconds: Read the plan back and add one missing note. Say: This is a usable plan for later making, not a finished artwork.

Arrival and starter

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Arrival 0 to 3 minutes

Pupil task: Find the plan you chose and your reason. Today you will develop the plan. Making comes later.

What to say: Find your selected rough plan and the reason from Monday. Today we will make it clear enough to use in a later making lesson. If the plan is missing, make two tiny honest options now and choose one. Record today's real date rather than inventing an earlier plan.

What good looks like: The pupil identifies an actual selected idea or makes a brief dated catch-up choice. They understand that the task is planning, not full artwork making.

Materials free fallback: Read back the ordered idea note. Pupil may describe the chosen idea or direct an adult to show it with small silent gestures.

Check and response: An honest fresh plan is valid. Keep the pupil's own intention and choice.

Starter 3 to 6 minutes

Pupil task: What does your chosen feature mean? What does another person need to know to help you make it?

What to say: Say the feature you chose and what it could suggest. Imagine a helpful adult reading your plan later. What would they need to know about the layout or order, tools, space or finish? We will add notes, not ask them to guess your intention.

What good looks like: The pupil identifies an intention and one missing practical detail. A different audience reading is allowed while the maker keeps control of the plan.

Materials free fallback: Adult asks two spoken choices at a time, such as order or tools. Pupil points, signs or gives one short answer.

Check and response: Useful missing detail: where a path turns, how many marks repeat, when a pause comes, which tools are needed, or how the sequence ends.

Modelling and cover guidance

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

I do 6 to 12 minutes

Pupil task: Watch a rough idea become a usable plan. Notice labels, counted tools, ordered steps and a time plan. A small plan can be clear.

What to say: My path plan has labels: start, block, turn and new route. I note one small sheet and two colour tools. My steps are place the main lines, add the turn, then check the meaning. My draft first making period is five minutes to set up, twenty to make, ten to check or change, and five to tidy: forty minutes. For a silent sequence I need no art tools. I note a clear seated space, four ordered actions and a stop cue. Staff can adjust the draft schedule before making.

What good looks like: The model connects intention, labelled layout or sequence, counted resources, access, ordered steps and a workable draft time plan. Pupils see a plan can stay simple. No artwork is claimed to be complete.

Materials free fallback: Read the same plan aloud. Pupil may direct an adult to place imagined parts or state four sequence actions. Use an oral materials list, access choice and time plan.

Check and response: Check: Is a list saying make it nice enough? No. A usable plan says what comes first, which resources or no-materials route is used, and how the maker will check and finish.

Store and log

Use the final two minutes of Review for quiet tidy-up. Keep paintings flat to dry, cap wet materials and wipe mats. Sound and movement pupils retain a simple sequence plan or dated adult observation plus their words. Work-only images are optional. Store the actual first attempt and log together.

Cover teacher route

Recover the selected plan or make a short honest catch-up choice. Model labels, counted resources or no-tools access, ordered steps and a draft first making-period schedule. Pupils develop an annotated layout or ordered sequence, then use a private read-back to check it. Do not begin full making or claim completed artwork. Keep the plan for next week. Follow the seven-stage timing.

Guided practice and task

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

We do 12 to 18 minutes

Pupil task: Help check a class plan for missing details. Add one label, step or resource note. Keep the maker in charge of the idea.

What to say: Our original plan says repeat, pause, change, return, but it does not say how to stop. Let us add an ending cue. Hinge: a plan has a title but no steps or tools. Should we A start full making and guess, B add the missing details before making, or C copy someone else's plan? Explain.

What good looks like: The pupil selects B and adds a practical detail that supports the maker's intention. Feedback concerns clarity and feasibility rather than forcing a different idea.

Materials free fallback: Use an oral four-part plan. Pupil directs the adult to insert one missing action, pause, access note or stop cue. Choose A, B or C aloud or by pointing.

Check and response: If A or C is chosen, model the confusion from one missing step. Parallel check: If a silent plan has no ending cue, should we add a clear stop before the making lesson? Yes. Continue when the pupil identifies a useful detail.

Create 18 to 32 minutes

Pupil task: Develop your chosen layout or sequence. Add short labels. Count the tools you need, or choose a no-materials route. List the steps, space, access choice and a draft time plan. Say how you will check the meaning.

What to say: Use the chosen idea, not a new full artwork. Add labels showing what the parts mean. Write or say the materials and quantities. For a silent piece, say no art tools and plan the space, actions and stop cue. Put making steps in order and choose a manageable first forty-minute schedule. Use the adult model if helpful. Note a quiet or supported access option. Check that the later making is possible, then keep the plan for next week.

What good looks like: An annotated layout or ordered sequence, resource quantities or no-materials choice, space/access note, ordered steps, draft time budget and meaning check form a usable plan. Staff approve tools and space before later making. Any unfinished planning is labelled honestly.

Materials free fallback: Pupil directs an adult through the layout or sequence and gives an oral tools/no-tools list, order, access and time plan. Adult retains exact confirmed notes. No materials or device are needed to participate.

Check and response: A workable simple plan could use one sheet, two colour tools and three ordered steps. A silent plan could use four small seated actions, a raised-hand stop and no art tools. These are options, not compulsory designs.

Optional progression evidence

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Optional next level stretch

What to say: If you want the extra task, Ask for one practical question about your plan. Decide what to keep or change and say why. Explain how your tools, time and access choices fit the idea. Set a check before making.

What good looks like: The pupil evaluates whether the plan can communicate the intention under real constraints, explains a feedback decision and identifies a readiness check before making.

Materials free fallback: Adult reads the full oral plan back and retains the practical question, pupil's decision, reasons and next check in exact confirmed words.

Retain: Keep the annotated plan, feedback, your decision with reasons, resource or access choices and the next check.

This task is extra. Your Explore work is complete without it. Keep the record in case your next level changes.

Review and evidence

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Review 32 to 37 minutes

Pupil task: Ask an adult or partner to read your plan back. What is clear? What still needs a note? You choose what to change. Keep the real plan.

What to say: Read or say the plan as if you will use it later. The listener describes one clear detail and asks one practical question. The maker decides whether to add or keep a feature and explains why. Use the final two minutes to tidy and store the selected plan, earlier options and log together.

What good looks like: The pupil checks the plan against intention and feasibility, considers feedback and retains ownership of a revision or reasoned decision to keep it. No full making or completed result is claimed.

Materials free fallback: Adult reads the exact oral plan back. Pupil confirms it or directs one change. A private audience is enough.

Check and response: Useful feedback: I know the four actions but not the ending cue. Useful response: I added a raised-hand stop so the ending is clear.

Exit 37 to 40 minutes

Pupil task: Arts log: My plan shows ___ through ___. I need ___. First I will ___. I kept or changed ___ because ___.

What to say: Record the actual plan, resources or no-tools route, ordered actions and one next check before making. Say what feedback you considered and what you decided. You can draw, speak, sign or use a scribe. I will read your words back. If a detail still needs staff approval, state that rather than pretending the plan is ready.

What good looks like: A dated log points to the real annotated plan or sequence and records a choice, practical next step and any remaining approval or missing detail. Explore planning is complete without optional stretch.

Materials free fallback: Pupil confirms the oral plan and next step. Adult retains the precise sequence and practical notes with the pupil's exact words.

Check and response: Example only: My plan shows finding a new route through a turning path. I need one sheet and two colour tools. I added a turn label because the listener asked where the path changes.

Access and teaching decisions

GROW Spring 1 Week 3 Wednesday 20 January 2027 P5 Year A Explore

Adaptations and prompt ladder

Cognition and Learning: Show one instruction at a time. Model a small test, offer two choices, then fade the prompt. Read the task and skill words aloud when needed.

Communication and Interaction: Allow pointing, signing, speech or an adult scribe. Give processing time. Use I chose ___ because ___. Read scribed words back for correction.

SEMH: Use a fictional feeling or abstract idea. Let pupils choose form and audience. Offer a calm pause and agreed return cue. Public performance and personal disclosure are optional.

Sensory and Physical: Offer silent seated movements, large marks and pupil-directed adult handling. Keep sound below talking volume. Stop on a raised hand. Ask before touching work.

EAL: Plan in any language. Teach words through marks and gestures. Accept a labelled sketch or oral explanation. Check meaning before spelling.

1. Point to the place or instruction.
2. Ask a short question.
3. Rephrase the instruction.
4. Provide a scaffold or choice.
5. Model the first step only, then return the task.

Common mistakes and fixes

Resilience means never pausing or asking for help. - A pause, support or a different route can be part of finding a way forward. Use invented or abstract ideas, not personal hardship.

Two ideas must be almost the same design. - Change the main subject, arrangement or sequence so the plans offer a real choice. Changing only a colour may not make a genuinely different idea.

A plan is a finished artwork. - Keep rough sketches, labels or short sequence notes as plans. The full making happens later. Do not claim completed artwork this week.

A more complex idea is always better. - Choose an idea that communicates an intention and can be made with the time, space, materials and access available. A small original piece can work well.

Feedback

Give one specific success and one next step. VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read this back; E evidence retained; R responded. Use R only when pupil voice and an audience are present, one NS is set, and the pupil responds in the same colour, on the same page or usual mode. A saved image alone is not R.

Where this leads

Artists, designers and performers test ideas and explain their choices. These skills help when working to a brief.
