Teacher and cover plan

Developing my resilience piece

Weekly outcome verbatim: Create my resilience-themed piece.

Year A · Resilience & Change · Explore · GROW Weekly Spring row 91

40 minutes: Arrival 3; Starter 3; I do 6; We do 6; Create 14; Review 5; Exit 3. Tidy in the final two Review minutes. Demonstration, route and stretch tasks use time within these stages.

Prepare

For up to five pupils: five real first versions with their Week 3 plans and Monday logs, five pencils and small workspaces. Retrieve the optional Week 2 skill records if using stretch.

Check each plan materials list in advance. Drawing fallback: five sheets plus scrap and five familiar drawing tools. Paper route: clean scrap and shared glue sticks. Use familiar materials and local procedures.

For paint only if planned and approved: mats, stable water pots, brushes, a small amount of familiar washable paint and cloths. Keep wet work away from electrical equipment.

Sound needs no instrument: quiet fingertips and a stop signal. Silent movement or directed adult actions need no materials. Offer seated, quiet and private options.

Set aside five safe storage places for unfinished work with its plan and actual log. No phone or media recording is required.

If prior work is missing

If prior work is missing, offer a brief honest restart: choose an invented idea and a small achievable form, state a first step and needed tools or no-materials route, then make a first version. Date it today and label it a new start. Do not claim missing earlier evidence.

Arrival and starter

Arrival · 3 minutes

Say and do: Reconnect the actual first version with Monday log. Let the pupil confirm or revise the next step. If absent, use the catch-up route and keep the reduced scope clear. Do not fabricate work from Monday.

Look for: Pupil identifies existing work and a manageable continuation.

Materials-free: Read back the actual action sequence and next step, then pupil confirms or corrects it.

Check and response: A short piece can be enough. Record any unfinished work honestly.

Starter · 3 minutes

Say and do: Ask the pupil to name a visible or performed feature and its intended effect. Choose one completion target within the fourteen-minute making time. It can be completing an ending, clarifying a turn or making a sequence repeatable.

Look for: The target is specific and achievable without changing the maker intention.

Materials-free: Select one part of the silent sequence to complete or make clearer.

Check and response: Resilience can be shown as getting help, pausing or finding another way. Avoid personal disclosure prompts.

Demonstration and shared practice

I do · 6 minutes

Say and do: Use the adult first section from Monday. Complete the new route into open space. Check whether the turn is clear. Try a longer gap on scrap or pause in the sequence; compare with the first version. I keep the short pause because it feels like a brief check before moving. I record the change from my plan and my reason. For visual work, keep the trial beside the piece; for movement, keep a precise witnessed sequence.

Look for: Adult completes a part, compares an actual change and records the maker decision. A changed choice is not automatically an improvement.

Materials-free: Perform the original short pause and a longer pause in the same hand sequence. Choose one and explain its effect.

Check and response: CfU: Does a longer pause always improve the piece? No. It depends on the intended effect. Ask which version fits the maker idea.

We do · 6 minutes

Say and do: Compare the two adult versions. Hinge: only the start of a piece is made. A: record finished; B: record what exists and the next step. Ask every pupil to choose, with private pointing allowed.

Look for: Pupil selects B and gives an accurate completion statement.

Materials-free: Use two live silent versions and identify exactly which parts were performed.

Check and response: B. If A, show the incomplete ending and model an honest record. Parallel check: a witness saw only the first two actions; may the record claim all four? No. Proceed when each pupil can state an actual next action.

Making and evidence

Create · 14 minutes

Say and do: Use about two minutes to retrieve and set up, nine to complete or develop the target, and three to check and record. Adapt to access needs. The pupil can use visual art, original quiet sound or silent movement as planned. Stop sound on a raised hand. Keep wet work stable. Avoid a wholesale restart unless the pupil can explain why and accept a smaller result. If the piece is already complete, use the time to refine one feature or rehearse a repeatable sequence, recording the real decision.

Look for: Pupil develops an actual piece and explains at least one decision, including a justified decision to keep a feature. The true completion stage is recorded.

Materials-free: Develop or direct a short silent sequence. Staff witness the final order, pauses, changes, help and pupil meaning. No recorded media is required.

Check and response: Example only: I completed the turn and ending. I tried a longer pause but kept the short pause because the route still feels steady.

Optional next level stretch

Compare your first and current versions against the Week 2 skill goal and Week 3 intention. Explain one feedback decision. Say what the tests show and what they do not show. Set a specific next practice step.

Keep actual versions or witness notes, pupil evaluation, feedback decision with reason and next skill goal.

Your Explore work is complete without this task. Extra evidence can inform a later level review; it does not certify a higher award.

Review and exit

Review · 5 minutes

Say and do: Invite a respectful observation rather than praise alone. The maker states whether the observed feature matches the intention. They may keep the piece without further change. In the final two minutes tidy materials and store work safely; keep trials and logs.

Look for: Pupil links actual features to intention, and stores evidence without claiming a later share or encounter.

Materials-free: Adult repeats the final sequence and reads back the witness description for correction.

Check and response: The audience can read the piece differently. The maker explanation and actual features are both worth keeping.

Exit · 3 minutes

Say and do: Retain dated actual work or the final witnessed sequence, plan, decision and changes. Record support. Pupils can draw, dictate or confirm by gesture. Keep optional stretch distinct from core Explore evidence. This is making and review, not a claim that the full award is complete.

Look for: The entry states the final current form, features, decisions, real completion stage and next step.

Materials-free: Confirm an oral entry and record the exact witnessed version and pupil words at the next opportunity.

Check and response: Example only: My silent piece shows another way forward through a pause and turn. It is complete as a short sequence; I would practise the ending next.

Access and adult support

Cognition And Learning

Give one step at a time, point to the current instruction and model the first step only. Keep the plan or test visible. Check understanding by asking the pupil to show the next step.

Communication And Interaction

Allow pointing, sign, speech, gesture or an adult scribe. Give processing time. Read scribed words back for confirmation. Use I chose ... because ... .

SEMH

Use invented or abstract ideas. Offer a quiet pause, private audience and a clear return cue. No personal disclosure, forced touch or public performance.

Sensory And Physical

Offer seated silent movement, larger comfortable actions or pupil-directed adult making. Allow looking without touch. Keep sounds below talking volume.

EAL

Plan in any language. Model the key words with objects or gestures; accept a drawing or oral sequence before fuller sentences.

Prompt ladder

1. Point to the place or instruction. 2. Ask a short question. 3. Rephrase. 4. Offer a scaffold or choice. 5. Model the first step only, then return the task.

TA focus

I do: Point to the demonstrated step. Check understanding without choosing the pupil meaning.

We do: Ask for a pupil choice, allow thinking time and use the least help needed.

Independent: Support access, retain actual work or a precise witness note, and confirm the pupil words and support used.

Where this leads

Artists and designers test a method, follow and adapt a plan, and explain choices to other people.
