Staff answers and decision rules

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Examples are adult models. They are never prefilled pupil evidence.

Arrival

A real new starting point is valid. It cannot be labelled as evidence of an earlier stage.

Starter

A specific feature might be a turn, repeated mark, pause or original phrase. The maker explains the intention; a neatness judgement is not the review.

I do

Check: Should the maker change everything at once? No. A small change makes its effect easier to judge. If unclear, compare changing one pause with changing the whole sequence.

We do

If A or C is chosen, state that feedback is optional and must be real. Parallel check: If either person says stop, do we stop and use staff or self-review? Yes. Continue when the pupil recognises a valid alternative.

Create

A test may make a turn clearer, lengthen a pause or change one original phrase. The pupil's actual form and intention determine the change. A real unsuccessful test remains useful evidence.

Review

Useful: The longer pause made the restart clearer to me. Or: The wider turn did not help, so I will try a shorter line. Both are honest test reviews.

Exit

Example only: I notice the restart is unclear. I tested a longer pause. It felt clearer to me. I used a staff comment, not a peer comment. Next I will use the pause in my piece.

Teacher example

Teacher model only: My plan meant to show another route. I notice the turn is hard to see. I tested a shorter line. The turn looked clearer to me. I used self-review and no peer comment. Next I will revise that line in the piece.

Teacher model only: My quiet sequence has a restart. I tested a longer pause, but it felt too slow to me. I will try a smaller pause change next. I keep the actual test, even though it did not help.
