Review and choose one change teacher and cover plan

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Teach one 40 minute lesson. Both pathways use Explore. Review and improve my work.

Today: I can review my real work and test one change for a reason.

Success criteria

I can review my intention, features and real progress.

I can choose one small change and test it.

I can record the actual result and my next step.

Prepare before pupils arrive

For five pupils: five actual selected plans, five actual pieces or precise live-sequence records, five arts logs and five pencils. Keep the Week 4 process evidence with each pupil's own work.

Prepare only resources needed for the small chosen revisions. A dry visual route might use five small test spaces and ten colour tools shared in pairs. Retain before and after notes without covering the original record.

If the actual medium needs paint: six familiar brushes, five mats, three stable water pots, small amounts of familiar non-toxic paint and cloths. Keep wet work flat and away from electrical items. No new tool is compulsory.

If the piece uses paper parts: up to ten prepared scraps and three glue sticks for small tests. Use torn or prepared parts if cutting is a barrier, following local procedures.

For original sound, words or silent movement: a quiet seated space, the actual sequence or text note, and a start and stop cue. No recording device, instrument or copied text is required.

Optional private peer route: one short feedback prompt per pair, with an adult checking consent on both sides. A peer, public share or recorded media is not required for the lesson.

Adult model: one original piece or sequence, its short plan, a real starting-state note and one actual feature revision. All samples remain labelled teacher models.

Set a clear stop signal and quiet option. Offer an invented feeling or abstract theme. Have the prior work or an honest catch-up trial ready for lesson two.

Timing

Arrival 0-3; Starter 3-6; I do 6-12; We do 12-18; Create 18-32; Review 32-37; Exit 37-40 minutes. Tidy in the final two minutes of Review.

Non specialist demonstration

0 to 15 seconds: Show the actual adult plan and piece. Say: I wanted a new route. I notice the turn is hard to see.

15 to 30 seconds: Name the actual form, state and help. Say: I choose one small turn change, not a whole new design.

30 to 45 seconds: Make a real small test and compare it. Say: This is what changed. I will describe the actual effect.

45 to 60 seconds: Record the next revision and true feedback route. Say: I used self-review. No peer comment was used. This is an adult model.

Arrival and starter

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Arrival 0 to 3 minutes

Pupil task: Find your real plan, piece and process record. Use a quiet or private route if helpful.

What to say: Recover the real plan and work or precise live-sequence record. We review what actually exists. If the plan or piece is missing, agree a small honest plan and make a simple new starting piece or sequence now, dated today. It becomes today's starting point, not invented earlier work.

What good looks like: The pupil identifies their actual work, intention and starting condition. A new catch-up record is labelled with today's date and source. No old image or decision is fabricated.

Materials free fallback: Read back the real sequence note or let the pupil direct a short current sequence. If no record exists, witness a small new starting sequence today.

Check and response: A real new starting point is valid. It cannot be labelled as evidence of an earlier stage.

Starter 3 to 6 minutes

Pupil task: Review your intention and one feature. Name the form or tools, what is made and the help used.

What to say: Use five short review prompts. What did you want the work to suggest about resilience? Which feature helps that idea? What form or materials did you use? What is actually made so far? What help did you use? You can say that a part is unfinished.

What good looks like: The pupil gives or confirms a structured self-review grounded in the plan and actual piece. Staff distinguish intended meaning from observed features and note support honestly.

Materials free fallback: Ask one prompt at a time through speech, sign or gesture. Adult reads a precise current-state note back for pupil confirmation.

Check and response: A specific feature might be a turn, repeated mark, pause or original phrase. The maker explains the intention; a neatness judgement is not the review.

Modelling and cover guidance

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

I do 6 to 12 minutes

Pupil task: Watch an adult review a real example. See one small change being tested. A test can help, stay similar or need another try.

What to say: My plan says the path should show finding another route. I notice the turn is hard to see. I used dry marks, and the small piece is made. My one test is to make the turn clearer on a small test area. I compare it with the real starting feature and say what changed. I do not claim better unless I can explain the effect. For a quiet sequence I could test one pause. These are adult models.

What good looks like: The adult uses intention, feature, form/materials, progress and help, then tests one achievable revision. The real starting point and actual effect are distinct. Pupils see that feedback and a test support a choice rather than force praise.

Materials free fallback: Perform or direct two quiet or silent versions differing in one feature. Adult describes the actual change and effect. A device or art materials are not needed.

Check and response: Check: Should the maker change everything at once? No. A small change makes its effect easier to judge. If unclear, compare changing one pause with changing the whole sequence.

Store and log

Use the final two minutes of Review for quiet tidy-up. Keep paintings flat to dry, cap wet materials and wipe mats. Sound and movement pupils retain a simple sequence plan or dated adult observation plus their words. Work-only images are optional. Store the actual first attempt and log together.

Cover teacher route

Recover the real plan, actual work and process note. If missing, make a small dated plan and current starting piece or sequence. Use the five self-review prompts, model one achievable feature change and let pupils test it. Self-review or a staff comment is enough; optional private peer feedback needs both people's consent and stops on request. Keep the real test and next revision for period two. Follow the seven-stage timing.

Guided practice and task

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

We do 12 to 18 minutes

Pupil task: Use self-review or ask for one comment. A private peer comment needs both people to agree. Choose one change for your own intention. You or the peer may stop. Self or staff review is enough.

What to say: First review the work yourself. A staff comment can help. If you want one private peer comment, choose one part to show and ask the peer too. Either person can stop. The peer says one feature they notice and its possible effect, with no marks or rankings. Hinge: which route is valid? A force a peer to comment, B use self-review or a staff comment if peer feedback is not used, or C invent a peer comment. Explain. Use at most one peer comment across both periods; retain this actual comment for the second lesson if used.

What good looks like: The pupil chooses B and retains ownership of the change. If peer feedback is used, both agree, only one chosen part is shown privately and one feature-based comment is retained. If not used, the actual route is labelled without penalty.

Materials free fallback: Use oral self-review or a private staff comment on the actual observed sequence. Record peer comment not used, declined, unavailable or stopped, as true.

Check and response: If A or C is chosen, state that feedback is optional and must be real. Parallel check: If either person says stop, do we stop and use staff or self-review? Yes. Continue when the pupil recognises a valid alternative.

Create 18 to 32 minutes

Pupil task: Choose one small change from your review. Test it in your actual form or a small test version. Keep the real starting feature and the test result. Record what the test did and what you will revise next time.

What to say: Choose one change that could help your intention and can be done with available tools and access. Test only that feature. Keep the real current-state note and actual test, then say whether the effect helped, stayed similar or needs another try. You may direct an adult. Keep the same form when possible. If access requires a new form, make a new dated starting point in that form before the test.

What good looks like: One achievable revision is tested and retained with a reason and actual effect. The structured review leads to a clear next making step. No improvement is assumed and an access change alone is not presented as artistic progress.

Materials free fallback: Perform or direct a planned quiet or silent sequence, then revise one pause, order detail or action. Adult witnesses both actual versions and retains precise notes and the pupil's reason.

Check and response: A test may make a turn clearer, lengthen a pause or change one original phrase. The pupil's actual form and intention determine the change. A real unsuccessful test remains useful evidence.

Optional progression evidence

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Optional next level stretch

What to say: If you want the extra task, Use your review to explain one strength and one need. Link your test to the intended effect. Say how a real comment or your own review shaped the choice. Plan one next revision.

What good looks like: The pupil weighs actual evidence against intention, explains a feedback or self-review decision and proposes a specific feasible revision. Peer feedback is not required.

Materials free fallback: Adult witnesses the real versions and records the same review in exact confirmed pupil words, clearly naming the actual feedback route.

Retain: Keep the real work reference, structured review, actual test, feedback route, your reasons and next revision.

This task is extra. Your Explore work is complete without it. Keep the record in case your next level changes.

Review and evidence

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Review 32 to 37 minutes

Pupil task: Compare the real feature and test. What did the change do? What will you try next? Keep the comment route and your decision honest.

What to say: Use one feature as evidence for your view. Say what changed, what helped or did not help, and the small revision you intend to make in the second period. Record self, staff or one private peer comment as the route actually used. A peer route can be declined or stopped. Use the final two minutes to tidy and store the actual work, test and log.

What good looks like: The pupil links a real test to the intention and chooses a manageable next revision. The feedback route is accurate and no person judgement or public display is introduced.

Materials free fallback: Adult reads both observed versions and the pupil's decision back. A private oral review is enough. Retain a precise note rather than inventing media.

Check and response: Useful: The longer pause made the restart clearer to me. Or: The wider turn did not help, so I will try a shorter line. Both are honest test reviews.

Exit 37 to 40 minutes

Pupil task: Arts log: I notice ___. My test changed ___. The effect was ___. My next revision is ___ because ___.

What to say: Date the real review and test. Record the intention, chosen feature, one test, actual effect, help and next revision. Add the feedback route and state clearly if a peer comment was not used, declined, unavailable or stopped. I can scribe your words and read them back.

What good looks like: The dated arts log links actual work, a specific change test and a next revision. It accurately separates the pupil's view from any staff or optional peer comment.

Materials free fallback: Pupil gives an oral or gestured log. Adult retains precise actual observations and exact confirmed words at the next recording opportunity.

Check and response: Example only: I notice the restart is unclear. I tested a longer pause. It felt clearer to me. I used a staff comment, not a peer comment. Next I will use the pause in my piece.

Access and teaching decisions

GROW Spring 1 Week 5 Monday 1 February 2027 P6 Year A Explore

Adaptations and prompt ladder

Cognition and Learning: Show one instruction at a time. Model a small test, offer two choices, then fade the prompt. Read the task and skill words aloud when needed.

Communication and Interaction: Allow pointing, signing, speech or an adult scribe. Give processing time. Use I chose ___ because ___. Read scribed words back for correction.

SEMH: Use a fictional feeling or abstract idea. Let pupils choose form and audience. Offer a calm pause and agreed return cue. Public performance and personal disclosure are optional.

Sensory and Physical: Offer silent seated movements, large marks and pupil-directed adult handling. Keep sound below talking volume. Stop on a raised hand. Ask before touching work.

EAL: Plan in any language. Teach words through marks and gestures. Accept a labelled sketch or oral explanation. Check meaning before spelling.

1. Point to the place or instruction.
2. Ask a short question.
3. Rephrase the instruction.
4. Provide a scaffold or choice.
5. Model the first step only, then return the task.

Common mistakes and fixes

A comment tells the maker what they must do. - The maker considers a feature-based comment and chooses a change for their intention. Feedback is advice, not an instruction to please someone.

Everyone must show work to a peer. - Peer feedback is optional. Both people agree, one chosen part is shown privately, and either can stop. A staff comment or self-review completes the core task.

A revision must make the result better immediately. - Make a purposeful change and record its actual effect. An unsuccessful test is retained honestly with a next step. Do not claim improvement without evidence.

A missing old image or comment can be made up later. - Use the real current work and notes. Make a new dated starting point if needed. State when a peer comment was not used, declined or unavailable.

Feedback

Give one specific success and one next step. VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read this back; E evidence retained; R responded. Use R only when pupil voice and an audience are present, one NS is set, and the pupil responds in the same colour, on the same page or usual mode. A saved image alone is not R.

Where this leads

Artists, designers and performers test ideas and explain their choices. These skills help when working to a brief.
