One real revision and its effect teacher and cover plan

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

Teach one 40 minute lesson. Both pathways use Explore. Review and improve my work.

Today: I can make one chosen change and record what it actually did.

Success criteria

I can use my real review and choose one revision.

I can make that change and keep a true before and after record.

I can explain the actual effect, support and next step.

Prepare before pupils arrive

For five pupils: five actual selected plans, five actual pieces or precise live-sequence records, five arts logs and five pencils. Keep the Week 4 process evidence with each pupil's own work.

Prepare only resources needed for the small chosen revisions. A dry visual route might use five small test spaces and ten colour tools shared in pairs. Retain before and after notes without covering the original record.

If the actual medium needs paint: six familiar brushes, five mats, three stable water pots, small amounts of familiar non-toxic paint and cloths. Keep wet work flat and away from electrical items. No new tool is compulsory.

If the piece uses paper parts: up to ten prepared scraps and three glue sticks for small tests. Use torn or prepared parts if cutting is a barrier, following local procedures.

For original sound, words or silent movement: a quiet seated space, the actual sequence or text note, and a start and stop cue. No recording device, instrument or copied text is required.

Optional private peer route: one short feedback prompt per pair, with an adult checking consent on both sides. A peer, public share or recorded media is not required for the lesson.

Adult model: one original piece or sequence, its short plan, a real starting-state note and one actual feature revision. All samples remain labelled teacher models.

Set a clear stop signal and quiet option. Offer an invented feeling or abstract theme. Have the prior work or an honest catch-up trial ready for lesson two.

Timing

Arrival 0-3; Starter 3-6; I do 6-12; We do 12-18; Create 18-32; Review 32-37; Exit 37-40 minutes. Tidy in the final two minutes of Review.

Non specialist demonstration

0 to 15 seconds: Point to the actual adult starting feature and review. Say: I choose one line to revise.

15 to 30 seconds: Make the real small change. Say: I have changed the line, not just planned a change.

30 to 45 seconds: Compare both actual records. Say what the change did, including an unhelpful effect if that is what happened.

45 to 60 seconds: Record the actual result, support, feedback route and next step. Say: This is an adult model. Your log must show your own real revision.

Arrival and starter

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

Arrival 0 to 3 minutes

Pupil task: Find your real piece, review and test. Name the one change you chose.

What to say: Recover the real plan, current work, review and test from Monday. State the one feature you intend to revise. If records are missing, use a new small dated starting point and an honest self-review now. Do not invent an earlier piece, comment, test or photo.

What good looks like: The pupil identifies an actual starting state and a chosen manageable revision. Missing earlier evidence remains visible and any catch-up work is dated today.

Materials free fallback: Read back the actual live-sequence note. Pupil confirms it or directs a new short starting sequence if needed.

Check and response: Use what really exists. A new current starting point supports today's revision without proving an earlier history.

Starter 3 to 6 minutes

Pupil task: Show what the work is meant to suggest. How could your one change help that idea?

What to say: Look at the intention from the real plan or today's honest catch-up plan. Which feature will change? How could the change affect the resilience idea? Keep the aim small enough to do today. A change of access may be needed, but it is not proof of artistic improvement.

What good looks like: The pupil names one achievable revision and a possible intended effect. They keep the same medium where possible or establish a fresh baseline if access requires another form.

Materials free fallback: Pupil states, signs or directs the intended change to a quiet or silent sequence. Adult records the real starting actions before the revision.

Check and response: A clear aim might be make one turn easier to see, shorten a pause or replace one original word. The reason should relate to the maker's intention.

Modelling and cover guidance

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

I do 6 to 12 minutes

Pupil task: Watch one real change being made. Compare the actual before and after feature. The result may help or need another try.

What to say: Here is my actual starting feature. I shorten this line to make the turn easier to see. That is a real revision, not just a promise to change. I compare the before note and the actual new line. I explain whether the effect helped. If it did not help, I retain the true test and choose another next step. For a silent piece I change one pause and perform both actual versions. These are adult models.

What good looks like: The adult makes one concrete revision and compares a real before state with its actual result. No better outcome is assumed. A reversed unsuccessful trial remains labelled as a real attempted change, not hidden.

Materials free fallback: Perform or direct two actual quiet or silent versions with one revised feature. Adult notes the precise before and after actions, effect and decision.

Check and response: Check: Which shows revision? A saying I might change later, B changing one actual feature and recording its effect, or C copying an adult's finished example. B. If unclear, model the difference between planning and doing one change.

Store and log

Use the final two minutes of Review for quiet tidy-up. Keep paintings flat to dry, cap wet materials and wipe mats. Sound and movement pupils retain a simple sequence plan or dated adult observation plus their words. Work-only images are optional. Store the actual first attempt and log together.

Cover teacher route

Recover real work, review and the chosen next revision, or establish a small honest starting point today. Model one actual feature change. Pupils make their revision, keep genuine before and after records and explain the actual effect. Do not replace doing a change with a plan to change, or invent improvement. Self or staff review is sufficient; optional private peer feedback needs consent on both sides and can stop. Follow the seven-stage timing.

Guided practice and task

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

We do 12 to 18 minutes

Pupil task: Use one real review comment or self-review. Direct one change in a class example. Say what actually changed. One private peer comment is optional. Both agree and either may stop.

What to say: Use the class example's intention and one real feature observation to direct a small change. This is still adult model work, not your evidence. Optional peer feedback follows the same consent rule: both agree, one chosen part, one private comment and either may stop. Hinge: a real revision did not help the intended effect. Should we A pretend it improved, B hide the test, or C keep the true test and plan a next step? Explain. If a peer comment was already given on Monday, use that actual comment and do not ask for a second. Only if none has been used may the one optional comment be offered today.

What good looks like: The pupil chooses C and describes the actual attempted change without inventing success. Self or staff review remains enough. Any optional peer comment is consensual, private and feature-based.

Materials free fallback: Pupil directs an adult to change a quiet or silent example. Use self-review or a staff observation, then read the actual effect back for confirmation.

Check and response: If A or B is chosen, model an honest unsuccessful trial. Parallel check: If a longer pause feels less clear, can the maker record that and try a smaller change next? Yes. Continue when a truthful result and next step are accepted.

Create 18 to 32 minutes

Pupil task: Make your one chosen revision in the real piece or sequence. Keep the actual before and after feature. Say what changed and what effect you notice. Record help and a truthful next step.

What to say: Make the chosen change now in the actual piece or sequence. Retain a genuine before note or observed starting version and the real revised result. You may direct adult handling. Compare the changed feature with your intention and explain the effect. If the test is unhelpful, keep its record and choose a next step; you may restore a previous feature for a reason, but the actual attempted revision remains visible. Do not treat a different medium alone as an improvement.

What good looks like: One real purposeful revision is made and logged. The before and after states are actual, support is recorded and the pupil gives a reasoned account of the effect. The work can remain unfinished. A planned or merely retained feature alone does not replace the revision action.

Materials free fallback: Perform or direct the planned quiet or silent sequence, change one action, order detail, pause or original phrase, and perform or direct the revised version. Adult witnesses both actual versions and scribes the pupil's view and support.

Check and response: A revision can help, stay similar or reveal another need. The action and real effect are kept even when a later version restores the earlier feature. Never recreate an old photo and label it as earlier evidence.

Optional progression evidence

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

Optional next level stretch

What to say: If you want the extra task, Use both real records to judge your revision. Link the effect to your intention. Explain how a comment or self-review shaped your choice. Say what helped or did not help. Set a next step.

What good looks like: The pupil evaluates a concrete revision using actual evidence, distinguishes intention from observed effect and explains a reasoned response to feedback or self-review.

Materials free fallback: Adult witnesses both actual versions and retains the pupil's confirmed evaluation and support in precise notes. No recorded media or peer comment is required.

Retain: Keep the real before and after, revision action, effect, reasons, feedback route, support and next step.

This task is extra. Your Explore work is complete without it. Keep the record in case your next level changes.

Review and evidence

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

Review 32 to 37 minutes

Pupil task: Show the actual changed feature and both real records. Did the change help your intention? Say why. Keep the real result, support and next step.

What to say: Describe the chosen revision and a feature that supports your view. Say what helped or did not help. Keep the actual current version and truthful state, finished or still being made. Record self, staff or the one agreed private peer comment as actually used; state if peer feedback was declined, unavailable, stopped or not used. Use the final two minutes to tidy and store the work and records together.

What good looks like: The pupil evaluates an actual revision against intention, records support and gives a manageable next step without automatic praise or completion claims. Optional feedback remains private and accurately labelled.

Materials free fallback: Adult reads the real before and after sequence notes back. Pupil confirms, corrects or adds their own view. Private oral review is sufficient.

Check and response: Useful: I shortened the pause. The restart felt clearer to me. Or: The new line did not help, so I kept its test record and will try a different gap next.

Exit 37 to 40 minutes

Pupil task: Arts log: Before I ___. I changed ___. After I ___. The effect was ___ because ___. My next step is ___.

What to say: Date the real revision. Keep the starting feature, change, actual result, effect, support and next step together. Note the actual feedback route, including when no peer comment was used. I can scribe your exact words and read them back. Today's Explore revision work is complete without the optional next level task.

What good looks like: The log demonstrates one actual purposeful revision and an honest evaluation. It does not claim guaranteed improvement, a completed award or a public share.

Materials free fallback: Pupil confirms an oral or gestured review of the real versions. Adult retains precise observations and exact pupil words when recording materials are available.

Check and response: Example only: Before, the pause was long. I made it shorter. After, the restart felt clearer to me. I used self-review and no peer comment. Next I will check the ending.

Access and teaching decisions

GROW Spring 1 Week 5 Wednesday 3 February 2027 P5 Year A Explore

Adaptations and prompt ladder

Cognition and Learning: Show one instruction at a time. Model a small test, offer two choices, then fade the prompt. Read the task and skill words aloud when needed.

Communication and Interaction: Allow pointing, signing, speech or an adult scribe. Give processing time. Use I chose ___ because ___. Read scribed words back for correction.

SEMH: Use a fictional feeling or abstract idea. Let pupils choose form and audience. Offer a calm pause and agreed return cue. Public performance and personal disclosure are optional.

Sensory and Physical: Offer silent seated movements, large marks and pupil-directed adult handling. Keep sound below talking volume. Stop on a raised hand. Ask before touching work.

EAL: Plan in any language. Teach words through marks and gestures. Accept a labelled sketch or oral explanation. Check meaning before spelling.

1. Point to the place or instruction.
2. Ask a short question.
3. Rephrase the instruction.
4. Provide a scaffold or choice.
5. Model the first step only, then return the task.

Common mistakes and fixes

A comment tells the maker what they must do. - The maker considers a feature-based comment and chooses a change for their intention. Feedback is advice, not an instruction to please someone.

Everyone must show work to a peer. - Peer feedback is optional. Both people agree, one chosen part is shown privately, and either can stop. A staff comment or self-review completes the core task.

A revision must make the result better immediately. - Make a purposeful change and record its actual effect. An unsuccessful test is retained honestly with a next step. Do not claim improvement without evidence.

A missing old image or comment can be made up later. - Use the real current work and notes. Make a new dated starting point if needed. State when a peer comment was not used, declined or unavailable.

Feedback

Give one specific success and one next step. VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read this back; E evidence retained; R responded. Use R only when pupil voice and an audience are present, one NS is set, and the pupil responds in the same colour, on the same page or usual mode. A saved image alone is not R.

Where this leads

Artists, designers and performers test ideas and explain their choices. These skills help when working to a brief.
