Staff checks and model answers

GROW Spring 1 Week 6 Monday 8 February 2027 P6 Year A Explore

Arrival

Research is this week’s task for GROW. Only extra depth is optional. The current award level stays Explore.

Starter

Both choices are valid. The pupil’s reason must be their own. Do not score one artist as better than another.

I do

Check: Matisse cut painted paper is a source-supported fact. I find movable shapes useful is a personal view. Either needs accurate labelling.

We do

If B is chosen as fact, ask: Can the source prove what gives you an idea? No. Parallel check: retired in 1960 is a fact; I like this method is a view.

Create

Accept, for example, a correctly rephrased career change and one technique detail. If the pupil repeats the note exactly, cover it and ask them to explain the idea to an adult.

Review

We can check a method from the source. We cannot infer an artist’s private feelings from the method or impose a universal meaning on a colour.

Exit

The source can be a supplied printed note read aloud. The log must accurately name that route rather than claim the pupil visited a museum or website.

Misconceptions and evidence

GROW Spring 1 Week 6 Monday 8 February 2027 P6 Year A Explore

An adult scribe means it is not my review.

The ideas remain yours when the adult records your words, reads them back and notes the help.

A tick means the whole award is complete.

The grid records these six weekly outcomes only. Wider requirements and genuine evidence need a separate judgement.

Research means copying a source.

Explain its meaning in your own words, check accuracy and name the source.

An artist’s method proves their private feelings.

Separate public facts from your interpretation.

Cold call with choice of response

Foundation: Point to the source or piece you used.

Middle: What does this feature tell you?

Higher: Which evidence supports your view, and what remains uncertain?

Evidence rule

Keep the pupil’s dated own-word review or research, actual source or work reference, accurate support and the six-outcome tick-and-comment grid. Mark missing or unfinished evidence honestly. No completed award is inferred.
