Growing knowledge and seasonal calendar

Pink supported edition

Seasonal growing & plant care.

Three jobs

Sow: put in a seed.
Plant out: move a ready young plant outdoors.
Harvest: collect a ready crop.

Our January job

Check our indoor pea tray.
Plan future crops. No new outdoor sowing today.

Timing can change

Weather, frost and variety matter.
Check light, space and care.
A month does not promise a harvest.

Monthly growing guide

R = radish. L = looseleaf lettuce.
B = broad beans.

Month	Sow	Plant out	Harvest
January	None	None	None
February	B indoors	None	None
March	R, L outdoors B indoors or outdoors	B	None
April	R, L, B outdoors	L, B	R

March outdoor lettuce: late month, if conditions suit.
Plant out hardened young plants only.
Harvest only when ready. None means none in this route.

Crop space clues

Radish

Sow directly in its final space. Use a large draining container or prepared bed with suitable light. Avoid hot dry spells. Do not move young radish roots to a new growing space.

Looseleaf lettuce

Use a large draining container or bed with suitable light. Robust young plants can move outside after gradual hardening off. Check water and space as the plants grow.

Broad beans

Allow greater height, root room and support. Choose a suitable variety for the confirmed space. Robust young plants need gradual hardening off before planting out.

An adult checks the actual space.
Keep a choice provisional until checks are complete.
