Safe practical jobs and self check

White standard edition

Using gardening tools safely.

Practical job list

1 Choose a job with the adult. Check the tool and a clear working area. Cover cuts and use suitable footwear and gloves.

2 Use the hand trowel to fill a draining pot over a tray. If the adult judges the plant ready, help repot with the root ball intact. Otherwise use an empty pot for practice.

3 Use the hand fork only in an agreed empty area away from roots. Check moisture before using the watering can. No water may be needed.

4 Park tools. Brush soil off a blunt tool, wipe and dry it under supervision. Leave sharp blades and blade cleaning to the adult.

5 Return tools to the agreed dry store. Clear spills and wash hands with soap and water. Add your actual Week 3 growth entry.

No tasting or eating. You may observe or record. Park tools and tell the adult before a quiet pause.

My safe working self check

Use these checks in your book or tell an adult. Choose yes, help or not yet honestly. Ask the adult to compare with the observed task.

Safe working check	My check
I checked the tool and clear space.	Yes / help / not yet
I used the right tool and kept hands clear.	Yes / help / not yet
I parked tools and cleaned only blunt tools.	Yes / help / not yet
I stored tools and washed my hands.	Yes / help / not yet

My one line

I used ____ safely by ____.

Week 3 entry

Keep the original tray code and earlier records. Count emerged shoots and measure the same marked shoot from the medium surface in centimetres if visible. Record moisture, actual care and any pot or support change. No growth or no water needed can be true.
