Maintaining our area

Maintaining a growing area.

Gardening and enterprise
Resilience & Change

Before the maintenance job

Find the original tray or area code and agreed rota.

An adult takes a before photo of the area only.

Choose one job after checking what is needed.

Same view before and after. Keep people and labels out.

Our maintenance jobs

Job	Safe indoor or outdoor option
Tray care	Check moisture and give only the care needed.
Unwanted plants	Adult identifies any plant before safe removal.
Pots and labels	Brush checked empty pots. Prepare crop labels.
Paths and edges	Clear safe items after the adult area check.

Use indoor trays when outdoor conditions are unsuitable.

One agreed job

Use the correct checked tool and keep your free hand clear.

Work gently around plants and protect the roots.

Ask the adult about pests, damage or anything unknown.

You may observe, prepare a label or record instead.

Our safe action decision

A leaf has damage and the cause is unknown.

A Use a chemical treatment without checking.

B Look, record what is visible and tell the adult.

Which action fits our safe working routine?

My safe working self-check

Check	Yes, help or not yet
Before the job	I checked the tool, space and actual need.
During the job	I kept hands clear and protected crop roots.
After the job	I stored tools, cleared spills and washed hands.
If unsure	I stopped and asked the adult.

Check honestly against the task the adult observed.

Our Week 4 record

Keep the original tray code and all earlier entries.

Add actual growth, moisture and care. No change is valid.

I maintained ____ by ____.

The adult takes the after photo. Caption the real change.

Clear up and exit

Return tools, clear spills and wash hands.

Describe what changed or what needed no action.

Confirm the next check and adult daily care cover.

Keep photos in approved records. Do not publish or upload.
