Our horticulture records

Horticulture outcome.

Gardening and enterprise
Resilience & Change

The records we have

Find the original tray and marked-shoot codes.

Keep real earlier entries and mark unavailable values.

Check units, whole-leaf counts and visible condition.

A missing figure stays missing.

Our record review

Check	What we can explain
Height	Same shoot, endpoint, precision and cm units.
Leaves	Whole expanded leaves, using the agreed unit.
Condition	Colour, firmness or leaning actually noticed.
Pattern or limit	Real repeated values, or the missing-data limit.

Describe what the evidence supports.

Our growing calendar

Check the group’s crop choices and growing space.

Separate sowing, planting out and harvesting.

Explain one month choice and what could change it.

Weather, readiness and care can change the plan.

A truthful record decision

A height value is missing from the earlier record.

A Copy a value from the invented model.

B Mark it unavailable and explain the limit.

Which choice keeps the evidence accurate?

My short presentation

Part	My actual evidence
Record	Tray or shoot code ____ Figure ____
Pattern or limit	I noticed ____ I cannot yet tell ____
Calendar	Crop ____ Window ____ Condition ____
Next step	One care or recording step to review ____

Use private talk, pointing, writing or scribing.

My horticulture evidence

My records show ____.

Our calendar choice is ____ because ____.

Use the pupil evidence frame or your own words.

Review and next step

Keep the finished records and any honest gaps.

Agree one safe care or recording step to review.

Return tools and wash hands after plant work.

Next session: the ready plant and the care handover.
