Fieldwork writing support

Tuesday 15 December 2026 | P2 | 40 minutes | Year A

White paper version | Read quietly. Point, write, type or use a scribe. No reading aloud is required.

My six steps

1 Question: What am I finding out?
2 Method: What was counted, where and how?
3 Table: Are headings, units and totals clear?
4 Graph: Do the scale, key and bars match?
5 Findings: What do two exact counts show?
6 Evaluation: What is one limit and a better check?

Source words

My own fieldwork: “In our recorded sample…”
Supplied data: “The supplied practice set shows…”
Both: label each item and keep the claims separate.

Method frame

The sample has __ plots in __. The unit is __. The recorder chose __ and used __ categories. The record says __. I did / did not collect this data.

Finish

Point to all six sections. Tell an adult privately which step needs help. A scribe writes your words. You can choose quiet reading and do not have to read aloud.

Fieldwork writing support continued

Tuesday 15 December 2026 | P2 | 40 minutes | Year A

White paper version | Read quietly. Point, write, type or use a scribe. No reading aloud is required.

Evidence sentence frames

Finding: “The table shows __ in A and __ in B. The difference is __ plots. This suggests __ in these sections.”

Conclusion: “For the sampled route, __. The evidence is __. I cannot extend this to __.”

Evaluation: “One limit is __. It may affect __ because __. I would __. This would help by __.”

Graph check

Title. Category labels. Plot-count axis. Even scale from zero. A/B key. Bar heights. A zero label when needed. You may attach a graph from earlier work and show what you checked.

My own response

An adult next step may ask you to check a source, add a unit or narrow a claim. Keep your first answer and your change. Record any words, numbers or graph supplied for you.

Finish

Keep an individual response. A partner can discuss the directions, but each pupil gives their own findings and evaluation.
