

Teacher notes

STAFF ONLY · BUILD_SU1_W01

Outcome

Name and locate my school and local features.

Assessment

F: map check plus one independent location question.

Teaching

Model a simple map key; match symbols to places. Locate familiar features and describe a route using near/far/left/right.

Preparation and timing

Use the invented plan for practice. Supply a checked plan of the school and nearby features for the local task. No home addresses or other pupil personal details are needed.

Pupil pack: page 1 plan; pages 2–4 arrival routes; page 5 shared tasks; pages 6–8 independent routes; page 9 exit choices. Print only the chosen routes.

Opening 0; arrival 4; starter 3; model 6; shared 7; check 2; independent 12; review 3; exit 3. Total: 40 minutes.

Give one instruction at a time. Offer pointing, speech, drawing, typing or writing. Begin with two choices. Fade the prompt before the final location question.

Offer a quiet first attempt and a choice of response mode. Allow passing and an agreed pause. Name the next small step when the learner returns.

Arrival and starter answers

STAFF ONLY · BUILD_SU1_W01

Supported

1. The school is in the top-left square.
2. The tree picture shows the park.
3. That place is the library.
4. B marks the bus stop.

Standard

1. The school is in the top-left square.
2. L means the library.
3. The park is to the right of the library.
4. The bus stop is directly below the school.

Stretch

1. The school is in the top-left square.
2. A key explains what the map symbols mean.
3. Two squares right takes you to the park.
4. On this plan the library is nearer: one square rather than two.

Starter: library. The shelves and borrowing clue support this choice.

Model, shared work and exit

STAFF ONLY · BUILD_SU1_W01

Question: Where is the library on the Townside plan?

Evidence: The key says L is the library. Find the open-book picture.

Explain: From the school, move one square right. You reach the library.

Check: Point to S, then L. Keep the plan the same way up.

Clue hunt

L: Library. The open-book picture and L identify the library.

B: Bus stop. The bus picture and B identify the bus stop.

P: Park. The tree picture and P identify the park.

C: Clinic. The cross picture and C identify the clinic.

Visitor note

Change left to right. Keep the plan the same way up.

Local task and exit

Answers depend on your checked school plan. Confirm the school name and the location of each feature. Ask one new location question without a content prompt. Retain the pupil's own response and note access support. An invented Townside response alone does not assess knowledge of the pupil's real school.

Feedback and next steps

STAFF ONLY · BUILD_SU1_W01

Arrival: if the key is unfamiliar, offer two picture choices. Recheck with a different symbol.

Starter: if a pupil guesses, ask them to point to one clue. Hear the new explanation.

We do: if a match is secure, ask for a reason. If not, compare two places and try again.

Check: if left/right is confused, keep the plan still and trace from S to L. Ask the pupil to repair the note.

Independent: if ready, fade the content prompt. Let the pupil locate a new feature using their usual access support.

Exit: use the independent response to choose the next task: another feature, a new route or more key practice.

After a response, acknowledge what the pupil changed. Select a different next step from the evidence: reduce the prompt, try a new example, ask for a reason or move on. Keep support available without supplying the final answer.

Sources

Humanities Scheme of Work 2026–27, recovered Word document, BUILD Summer 1 Week 1. The outcome, teaching sequence and assessment wording above match this source.

Townside plan, clues, captioned model and visitor note: original invented teaching materials. The teacher supplies and verifies the real-school plan.

Lesson vocabulary

Use these definitions with the lesson and knowledge organiser.

local — Near the place we are talking about.

feature — Something in a place, such as a park or road.

map — A picture that shows where places are.

key — A guide to the symbols on a map.
