

Continents and oceans

Knowledge organiser | BUILD Humanities

Talk about the wider world using continents and oceans.

Words to use

Word	Meaning
continent	One of the seven large land regions in this lesson.
ocean	One of the five named parts of the connected global ocean.
world map	A flat picture showing places across Earth.
globe	A round model of Earth.

A method to use

1. Find land and ocean on the map.
2. Choose a continent name and find its region.
3. Choose an ocean name and find its water area.
4. Point, name and check both choices.

Remember

Seven continents: Africa, Antarctica, Asia, Australia, Europe, North America, South America.
Five oceans: Arctic, Atlantic, Indian, Pacific, Southern. Two Pacific labels on a flat map show the same ocean.
