

Teacher notes and answers

Our place in the wider world | GROW_SU1_W01 | STAFF ONLY

Lesson alignment

Outcome: Locate my place the UK and the wider world on maps.

Evidence: F: map-skills check and independent location/pattern question.

Teaching: Model zooming from locality to country and world. Practise location questions together; independently locate selected places and describe where one is using a suitable scale of map.

Preparation

Prepare a checked map of the school's locality in Teesside and atlas pages showing the UK and world. Keep the same locality in each view. Use the supplied world map for the wider context; do not treat its crowded UK-area labels as precise local positions. No home-address searches. If an atlas is unavailable, the teacher may use preselected printed map extracts.

Access

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts. Begin with a simplified map or data set, then add a stretch layer. Use clear fieldwork roles and a return-to-recording routine.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

Unit wording from the scheme of work

Exact supplied unit fields

Unit

My place and the wider world

Enquiry

How does our locality compare with other places?

Success criteria

I can locate places, use maps and grid references, collect observations, distinguish physical and human features and support a comparison with evidence.

Vocabulary

map, location, key, scale, grid reference, GIS, fieldwork, enquiry, data, observation, physical feature, human feature, land use, comparison

Resources

OS maps; atlases; digital GIS; local-area resources; contrasting-place images; tally sheets; vocabulary mats; scaffolded organisers.

Access and challenge

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts. Begin with a simplified map or data set, then add a stretch layer. Use clear fieldwork roles and a return-to-recording routine.

This lesson addresses the week's outcome; the full unit criteria describe the wider sequence. No qualification unit codes are assigned.

Teaching sequence

Nine stages totalling forty minutes

Stage	Min	Teaching focus
Opening	0	State the exact learning goal.
Arrival	4	Use the chosen retrieval route and supplied reminders.
Starter	3	Use word match.
I do	6	Model the four steps before individual work.
We do	7	Use the interactive map and partner routine.
Check	2	Ask for a first answer then check and improve.
Independent	12	Fade content prompts; retain access support.
Review	3	Check one detail and hear the learner's explanation.
Exit	3	Take two individual responses and choose the next step.

Worked model

Question: Which ocean lies to the west of the UK?

Evidence: Card B and the map show the UK in Europe and the Atlantic Ocean to its west.

Think aloud: I locate the UK marker, then read the ocean label to its west: Atlantic Ocean.

Check: I use a local map for the school entrance. The world view shows wider relationships, with less local detail.

Arrival answers

Staff only keep these off pupil sheets

Supported

1. The marker labelled UK.
2. Europe is a continent.
3. The Atlantic Ocean label west of the UK.
4. A detailed local map.

Standard

1. The meanings of map symbols.
2. Europe.
3. The Atlantic Ocean.
4. Less local detail is visible.

Stretch

1. It explains which feature a symbol represents.
2. The UK is in Europe, with the Atlantic Ocean to its west.
3. The North Sea.
4. It covers a very large area, so the entrance is too small to show accurately.

Method check

Use a detailed local map. The world map covers a much larger area and does not show the entrance.

Shared independent and exit checks

Record each learner's own response and the support used

Shared check: Teesside is in north-east England within the UK; the UK is in Europe. Middlesbrough is on the River Tees. Atlantic Ocean is west of the UK; North Sea is east. The world map shows wider relationships; the teacher's local map shows nearby detail.

Independent check: require accurate locations and a direction statement. For the school entrance, accept a detailed local map with an explanation about visible local detail. Stretch should compare what the local, UK and world views can show. Do not expect precise street positions on the world map.

Exit: accept a correct continent/water/direction relationship plus a justified map choice. Teesside → UK → Europe → world is the required location relationship. Compare map scale without claiming that zoom creates data which the map source does not contain.

Feedback and next attempt

Name the successful step. Give one precise next step, hear or read the pupil's response, then offer a fresh example. Ask which support helped. Record communication support separately from prompts that supplied a location or answer.

Evidence record

Own response and source

Access support or content prompts

Next step and fresh attempt

Map content and classroom checks

Natural Earth public domain map data: <https://www.naturalearthdata.com/about/terms-of-use/>

Exact unit and weekly text comes from the uploaded Humanities Scheme of Work HTML, GROW Summer 1. The map geometry and interface come from the specified finished donor. The wider-world geographical facts are also specified in the task brief. The practice grid and comparison cards are teaching examples.

Locality facts follow the supplied brief. Check them against the locality map selected for teaching. Preview the school's approved mapping tool before the lesson.

Local map source and date checked

Atlas pages selected for the UK and world

Lesson vocabulary

Use these definitions with the lesson and knowledge organiser.

continent — A large land region

ocean — A large body of salt water

location — Where something is

scale — How map distance relates to distance on the ground
