

# Teacher notes and answers

*Atlases grid references and digital maps | GROW\_SU1\_W02 | STAFF ONLY*

## Lesson alignment

Outcome: Use atlases grid references and digital maps.

Evidence: F: accurate grid references and independent location question.

Teaching: Compare how an atlas and digital map show the same location. Model a grid reference and route; partners set location challenges, followed by an individual map check.

## Preparation

Keep the supplied practice grid unchanged. Prepare the school's approved mapping tool for a teacher-led demonstration of a public place, with search, zoom and layers where available. Use the School on both fictional comparison cards; do not search for the invented practice place online. If the approved tool is unavailable, compare the supplied cards now and record that the live demonstration needs a later revisit. No pupil searches for a home address.

## Access

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts. Begin with a simplified map or data set, then add a stretch layer. Use clear fieldwork roles and a return-to-recording routine.

Offer a predictable start, private response and agreed pause. No cold calling or forced personal disclosure. Rejoin at one clearly named next step. Keep teen-appropriate examples and the same learning goal across response modes.

# Unit wording from the scheme of work

*Exact supplied unit fields*

## Unit

My place and the wider world

## Enquiry

How does our locality compare with other places?

## Success criteria

I can locate places, use maps and grid references, collect observations, distinguish physical and human features and support a comparison with evidence.

## Vocabulary

map, location, key, scale, grid reference, GIS, fieldwork, enquiry, data, observation, physical feature, human feature, land use, comparison

## Resources

OS maps; atlases; digital GIS; local-area resources; contrasting-place images; tally sheets; vocabulary mats; scaffolded organisers.

## Access and challenge

Chunk sources and tasks; pre-teach vocabulary with images. Offer sentence stems, organisers, oral rehearsal and typing. Start with one modelled example; extend through a second source, comparison or supported judgement. Check the learner can begin within two minutes, then fade prompts. Begin with a simplified map or data set, then add a stretch layer. Use clear fieldwork roles and a return-to-recording routine.

This lesson addresses the week's outcome; the full unit criteria describe the wider sequence. No qualification unit codes are assigned.

# Teaching sequence

*Nine stages totalling forty minutes*

| Stage       | Min | Teaching focus                                          |
|-------------|-----|---------------------------------------------------------|
| Opening     | 0   | State the exact learning goal.                          |
| Arrival     | 4   | Use the chosen retrieval route and supplied reminders.  |
| Starter     | 3   | Use true or false vocabulary cards.                     |
| I do        | 6   | Model the four steps before individual work.            |
| We do       | 7   | Use the interactive map and partner routine.            |
| Check       | 2   | Ask for a first answer then check and improve.          |
| Independent | 12  | Fade content prompts; retain access support.            |
| Review      | 3   | Check one detail and hear the learner's explanation.    |
| Exit        | 3   | Take two individual responses and choose the next step. |

## Worked model

Question: What is the Library's four-figure reference?

Evidence: Find Library. Read its left easting line, 10, then its bottom northing line, 21.

Think aloud: Join eastings before northings: Library is in 1021. Check the number printed on the map.

Check: The reference identifies a whole square. Trace School north to Library, then east to Hall.

# Arrival answers

*Staff only keep these off pupil sheets*

## **Supported**

1. Maps.
2. Easting.
3. School is in 1020.
4. The meanings of the symbols.

## **Standard**

1. It directs you to a page and a locator on that page.
2. Eastings before northings.
3. Hall is in 1121.
4. A whole grid square.

## **Stretch**

1. The index finds the map page and locator; the page grid locates the place on that page.
2. The first pair identifies the easting and the second pair the northing; swapping them changes the location.
3. Park is in 1122: easting 11, northing 22.
4. No. It is an invented practice grid without the detail needed for a safe real route.

## **Method check**

No. It identifies a square. A more detailed map and a checked entrance location are needed.

# Shared independent and exit checks

*Record each learner's own response and the support used*

Reference key: Library 1021; Hall 1121; Health centre 1221; Park 1122; School 1020; Bus stop 1220. Always use eastings before northings.

Shared and independent route: School 1020 → Library 1021 is north one square; Library 1021 → Hall 1121 is east one square. Reverse: Hall 1121 → Library 1021 west, then School 1020 south. This follows square locations and is not a safe real walking route.

Independent location: 1220 identifies Bus stop. Supported can select a useful control such as zoom and explain its use. Standard checks three requested features and compares the same School. Stretch checks four features, reverses the route and explains a source limitation.

Atlas/digital comparison: the atlas index supplies a page and page-grid locator, C2 in the fictional card. A digital search finds a named place; zoom changes the area/detail shown; layers select information. Both cards describe the same School. C2 is not a four-figure reference. Actual controls on the approved tool vary: preview them and record what was demonstrated.

Exit: Supported — Bus stop; eastings first. Standard — Health centre 1221, read 12 then 21; one accurate comparison. Stretch — the reverse route above; a reasoned choice of each mapping source and one limitation.

## Feedback and next attempt

Name the successful step. Give one precise next step, hear or read the pupil's response, then offer a fresh example. Ask which support helped. Record communication support separately from prompts that supplied a location or answer.

## Evidence record

**Own response and source**

---

**Access support or content prompts**

---

**Next step and fresh attempt**

---

# Sources and preparation record

*Map content and classroom checks*

Ordnance Survey grid references guide; authored practice grid:  
<https://osmaps.com/discover/guides/beginners-guide-to-grid-references/>

Same-place atlas and digital examples: ../../Sources\_and\_checks.html#comparison

Scheme of work: ../../Sources\_and\_checks.html#sow

Exact unit and weekly text comes from the uploaded Humanities Scheme of Work HTML, GROW Summer 1. The map geometry and interface come from the specified finished donor. The wider-world geographical facts are also specified in the task brief. The practice grid and comparison cards are teaching examples.

Locality facts follow the supplied brief. Check them against the locality map selected for teaching. Preview the school's approved mapping tool before the lesson.

## **Approved mapping tool and public demonstration place**

---

---

## **Search zoom and layers demonstrated or follow-up needed**

---

---

## Lesson vocabulary

Use these definitions with the lesson and knowledge organiser.

**atlas** — A collection of maps, often with an index

**grid reference** — Numbers or letters used to locate a map square

**easting** — A grid number read across the map first

**northing** — A grid number read up the map second
