Tier pack: Aspire route — Makers, tools and visual links

Pathway: BASE · Week 2 Part 2 · Big question: How do makers use layered card shapes to build bold relief art?

Aspire route studio steps

Step 1: Plan. Cut a three-layer frame using smooth and ridged card.

Step 2: Build overlap joins where cross-beams lock over main tall bars.

Step 3: Add small square card plates. Hole-punch discs as raised bolts.

Step 4: Sweep dry charcoal. White chalk across the surface to bring out depth.

Success check

Three-layer relief panel with bolt details. Tonal bright line.

Make-it studio planner

Choose your base shape, top texture, and detail for your relief board.

Options: Twin tall towers, Single wide arch, Criss-cross bridge, Stepped frame

Review checklist

[ ] Hold your board near the window or lamp so light hits the side.

[ ] Point to a real shadow made by your top card layer.

[ ] Check that all card corners are stuck down flat.
