Tier pack: Supported route — Surface texture skills lab

Pathway: BASE · Week 3 Part 2 · Big question: How can we use foil and dry brush marks to make card look like old metal?

Supported route studio steps

Step 1: Place your foil square on the foam mat over a line guide.

Step 2: Press three straight beam lines. A row of bolt dots with the wood stick.

Step 3: Swipe a pre-wiped chrome dry brush lightly across a black ridged card square.

Step 4: Glue both sample squares onto your skills lab sheet by their edges.

Success check

One pressed foil square. One dry-brushed card square mounted neatly.

Key words helper

• press: To press a raised bump or line into soft foil.

• dry brush: A brush with very little paint dragged lightly over bumps.

• metal: A hard shiny art tool like iron, steel, or tin.

Review checklist

[ ] Tilt your foil square in the light to check how the bumps shine.

[ ] Check that your dry-brushed card still has dark grooves between the chrome lines.

[ ] Tell a partner which of the two tricks you liked best.
