Staff answers & diagnostic guide — One photo, one comment, one page

Pathway: BASE · Week 5 Part 1 · Big question: How do we build a neat studio log page with a photo and a comment?

Starter answer & explanation

Question: Where should you put the glue stick marks when mounting a photo?

Correct: Around the back edges of the photo on a scrap mat — Yes. Gluing the back edges keeps the front of your log page clean.

Guided team check (We do) answers

Q1: What does 'dry-fitting' mean. First you glue a piece down? -> Placing the photo on the page without glue first to check the space (Yes. Checking the spot first stops crooked gluing.)

Q2: Which of these is the best studio log comment? -> I used white wax under blue ink and the star edges came out bright. (Yes. It names the tool you used and what worked well.)

Q3: How do you smooth down a glued photo without smudging it? -> Press gently from the centre out to the corners with a clean dry hand (Yes. Pressing from the middle out keeps it flat and bubble-free.)

Exit check answer

Question: Why do we place a photo on the page. First putting glue on the back?

Correct: To check it fits straight in the right space first — Yes. Dry-fitting makes sure your page looks neat.
