TA studio brief — Technique studio tasters

Pathway: TRACK · Week 1 Part 1 · Big question: How do four studio media change the mood and contrast of the same identity motif?

TA practical setup & focus

Set up four clearly labelled media trays on each table and keep damp paper towels ready for fingers after using dry pastel.

Studio kit: A3 four-panel studio sheet, 2B/4B graphite pencils, diluted ink and soft brush, chalk pastels, toned paper offcuts and glue

Key words to prompt

• medium: The specific art material or tool used to make marks.

• gradation: A smooth step-by-step shift from dark tone to light tone.

• wash: Thin ink or paint diluted with water for translucent tone.

• collage: Building an image by cutting, tearing, and layering paper shapes.

• motif: A central visual shape or emblem repeated across studies.

Supported route steps

1. Use the light guide template to place your motif in all four studio boxes.

2. Shade box 1 with 2B/4B pencil and paint Box 2 with two tones of diluted ink.

3. Blend two chalk pastel shades in Box 3 and glue three cut paper tones in Box 4.

4. Complete the stem under each box: 'This medium gives a ___ edge and ___ tone.'

Check: All four media panels completed with a completed observation stem under each.

Review & exit support

Exit question: Which studio technique uses water dilution to create lighter translucent grey tones from black ink?

Staff note: Staff preparation only: review a short studio demonstration comparing graphite, ink wash, dry pastel, and tonal paper collage.
