Pupil studio resources & worksheet — One skill, three tries, one log entry

Pathway: TRACK · Week 2 Part 1 · Big question: How does repeating one studio skill across three controlled trials build measurable control?

Arrival check

Think about learning a sport or instrument. Why is trying a skill three times in a row better than trying it once?

[ ] Each try lets you fix one small mistake from the try before

[ ] You learn how much hand pressure gives the smoothest tone

[ ] You can see real visual proof of progress side by side

Starter visual cues

Trial 1: Heavy outline, sudden jump from dark black to white paper, visible scratch lines.

Adjustment note: Use the side of the 4B pencil and lighten pressure in the middle zone.

Trial 2: Smoother mid-tone transition, cleaner outer contour.

Trial 3: Full five-step tonal range with a crisp highlight and cast shadow.

Vote: What is the most important step between finishing Trial 1 and starting Trial 2?

Studio practice planner

Select your focus skill, adjustment target, and log takeaway.

Shapes/Focus: Shaded 3D emblem, Cross-hatched motif, Graded ink wash form, Layered pastel symbol

Tools/Methods: Lighten mid-tone pressure, Tighten hatch spacing, Control brush water load, Sharpen outer contour

Exit ticket

Why do we write a quick adjustment note between Trial 1 and Trial 2?

[ ] So we know exactly what change in pressure or spacing we are testing in the next box

[ ] To waste drawing time

[ ] Because trial 1 is the final piece
