TA studio brief — One skill, three tries, one log entry

Pathway: TRACK · Week 2 Part 1 · Big question: How does repeating one studio skill across three controlled trials build measurable control?

TA practical setup & focus

Use a visible 6-minute timer for each of the three trials so pupils pace their practice evenly across all three boxes.

Studio kit: Three-trial progression sheets, 2B/4B/6B pencils, fineliners, ink wash brushes, blending stumps, studio log frames

Key words to prompt

• trial: A deliberate practice attempt focused on improving one specific technique.

• pressure: How firmly or lightly you press the tool onto the paper surface.

• cross-hatching: Building dark tone by layering intersecting sets of parallel lines.

• control: Making the tool produce the exact tone and edge you intend.

• progression: Visible step-by-step improvement across consecutive attempts.

Supported route steps

1. Pick one studio skill (pencil shading or pen hatching) and use the printed form outline in Boxes 1, 2, and 3.

2. Complete box 1, then tick one adjustment target ('press lighter in the middle' or 'keep lines closer').

3. Complete box 2 and Box 3 applying your ticked adjustment.

4. Fill in the log stem: 'From trial 1 to Trial 3, my ___ became more ___.'

Check: Three progressive trials completed with ticked adjustment and reflection stem.

Review & exit support

Exit question: Why do we write a quick adjustment note between Trial 1 and Trial 2?

Staff note: Staff preparation only: review a short clip on running timed three-trial deliberate practice strips in the art studio.
