Tier pack: Aspire route — Framing a site-specific visual brief

Pathway: SUMMIT · Week 1 Part 2 · Big question: How do architects and public artists analyse spatial context, sightlines, and structural form to write a rigorous studio brief?

Aspire route studio steps

Step 1: Execute both a front elevation and a side cross-section profile showing exact millimetre step-ups across Layers 1, 2, and 3.

Step 2: Integrate a material key specifying how corrugated fluting, laminated greyboard, and embossed foil will distribute light and shadow.

Step 3: Write a rigorous design rationale defending how your brief balances structural tension with tonal clarity.

Success check

Orthographic elevation and side section profile with material key and design rationale.

Make-it studio planner

Establish the parameters for your site-specific studio brief.

Options: Form: Cantilevered truss span, Form: Interlocking arch void, Form: Vertical lattice tower, Form: Ribbed vault elevation

Review checklist

[ ] Check that your elevation drawing clearly labels Layer 1 (base), Layer 2 (mid), and Layer 3 (high relief).

[ ] Confirm all four written sections of your Studio brief are complete and legible.

[ ] File your Studio brief as the master plan for your practical build.
