Pupil studio resources & worksheet — Designing a peer studio workshop project

Pathway: SUMMIT · Week 5 Part 2 · Big question: How do we design a structured, safe, and inspiring practical workshop to lead our peers in building a relief study?

Arrival check

In weeks 6 and 7, you step up as Studio workshop Leaders. What makes a 15-minute practical art workshop succeed smoothly?

[ ] Pre-cutting the base blanks so participants spend 100% of the time on the core creative technique

[ ] Having three real physical stage tiles on the table so everyone can see Step 1, Step 2, and Step 3

[ ] Building in a clear 30-second safety briefing at the start

Starter visual cues

Pillar 1 (Learning goal & Time plan): A focused 15-minute breakdown (2 min intro/safety, 10 min guided make, 3 min review).

Pillar 2 (Visual Stage Exemplars): Three mounted physical tiles showing Stage 1 (Prep), Stage 2 (Build/Layer), Stage 3 (Patina).

Pillar 3 (Material kit & Prep): Exact list of pre-cut blanks, tools, and shared trays.

Pillar 4 (Safety & Contingency check): Clear controls for safety rulers, foil edges, and drying.

Vote: Why do effective workshop leaders prepare pre-sized base tiles for a 15-minute session rather than asking participants to measure and saw large boards from scratch?

Studio practice planner

Design your studio workshop leadership pack.

Shapes/Focus: Topic: Embossed foil patina, Topic: Laminated truss gusset, Topic: Collagraph ridge dry-brush, Topic: Negative-space relief

Tools/Methods: Pacing: 2m safety / 10m make / 3m check, Scaffold: 3 physical stage tiles, Prep: Pre-cut 8cm base blanks, Safety: Folded foil & tool dock

Exit ticket

In workshop design, why do we prepare physical Stage 1, Stage 2, and Stage 3 exemplar tiles AND pre-cut base blanks?

[ ] To remove setup bottlenecks and give participants clear visual benchmarks at every stage of the 15-minute build

[ ] So participants only watch and never touch any materials

[ ] To use up spare card
