# Grip or glide? The surface challenge · Word Page

Learning goal: I can explain how friction acts between touching surfaces and judge when grip or glide is useful.

## Words for This Lesson

friction: a contact force between two surfaces that slide or try to slide past each other

contact force: a force that acts only when two objects or surfaces touch

grip: high resistance to slipping between two touching surfaces

lubrication: adding oil or grease to reduce unwanted friction between moving parts

## How to Use These Words

Point to a word when you explain your idea.

Help: Friction acts between __ and __. It opposes sliding, which helps / hinders because __.
