Mechanisms · Tier Pack · Supported

Learning goal: I can identify levers, pulleys, and gears and explain how they let a small effort move a heavy load.

Supported Route (Book First)

Label Load, Pivot, and Effort on the lever diagram and match crowbar, flagpole, and bike cog to lever, pulley, and gear.

Help: Bar + pivot = lever. Wheel + rope = pulley. Toothed wheels = gears.

Optional Make It · Supported

Make a labelled Lever Strip

Stick Load, Pivot, and Effort labels in the right places on a paper lever strip and copy the three labels into your book.

Word Help

mechanism: a simple machine such as a lever, pulley, or gear that changes a force

lever: a stiff bar that turns on a pivot to lift or move a load

pivot: the fixed resting point (fulcrum) that a lever turns around

pulley: a grooved wheel with a rope that changes the direction or size of a pull

Exit Check

Name the fixed point that a lever turns around.
