

Fieldwork in our grounds

Knowledge organiser | BUILD Humanities

Carry out simple fieldwork in the grounds.

Words to use

Word	Meaning
fieldwork	Finding out about a place by observing it there.
observation	Something noticed by looking carefully.
tally	One mark for each thing counted; group marks in fives.
data	Information collected to answer a question.

A method to use

1. Agree the question, route, boundaries and roles.
2. Observe one feature at a time.
3. Make one tally mark per object.
4. Return, count the marks and check the total.

Remember

Use one tally mark per object. Stay with the adult inside the agreed grounds. Practice data is not evidence of an outdoor visit.
