

Atlases grid references and digital maps

Knowledge organiser | GROW Humanities

Use atlases grid references and digital maps.

Words to use

Word	Meaning
atlas	A collection of maps, often with an index
grid reference	Numbers or letters used to locate a map square
easting	A grid number read across the map first
northing	A grid number read up the map second

Map reading method

Find the feature and its square.

Read the easting at the left, then the northing at the bottom.

Join the two pairs and check the printed reference.

Compare atlas index/page grid with digital search/zoom/layers.

Remember

Four figures identify a square. Atlas page locators use the atlas's own system. Digital layers change the information shown. The teacher uses an approved tool and a public place. Never search for a home address.

My explanation

Eastings first: _____. Northings second: _____. The square is _____. An atlas ____; a digital map _____.
