

Teacher notes and answers

An accurate Earth Day campaign | LAUNCH_SU1_W04 | STAFF ONLY

Lesson alignment

Outcome: Create a digital sustainability campaign linked to Earth Day.

Evidence: F: campaign accuracy, evidence and two exit questions.

Teaching: Analyse how a short campaign uses claims and evidence. Identify an audience and feasible action; independently create a digital message with accurate supporting evidence and explain its intended effect.

Preparation

Prepare the cards, organiser and one task route. Model the four steps before independent work. Use the supplied source record and distinguish real evidence from authored scenarios. The teacher supplies the school's copy of No One Is Too Small by Greta Thunberg; no extract or quotation is included. Use only a school-approved classroom device. Create a digital slide or document, not a real social-media post. No accounts, names, faces or home details. Earth Day is 22 April; the message may be prepared for that date or reviewed afterwards.

Offer a calm start, an agreed pause and a private response option. Accept speech, pointing, typing or writing. Invite reasoned disagreement without personal or family disclosure.

Exact unit wording

Scheme of work: LAUNCH Summer 1

Unit

Resources climate and sustainability

Enquiry

How can we make a justified decision about sustainability?

Success criteria

I can interpret resource and climate evidence, evaluate responses, compare options against criteria and justify a practical decision.

Vocabulary

resource, sustainability, climate change, mitigation, adaptation, cause, effect, response, evidence, provenance, usefulness, decision, criteria

Resources

Climate and sustainability data; selected No One Is Too Small extracts by Thunberg; online data sets; curated sources; highlighters; prepared tables; spreadsheet or graph paper; planning frame; presentation device; glossary.

Access and challenge

Pre-teach terminology and model evidence use. Chunk sources and data; provide an initial frame, then reduce it. Maintain normal access arrangements. Extend by weighing limitations, alternative explanations and evidence quality. Adults support access and evidence selection without supplying answers. Use labelled examples and a reduced data set before the full task.

Teaching sequence

Nine stages totalling forty minutes

Stage	Min	Focus
Opening	0	State the enquiry and goal.
Arrival	4	Use supplied reminders and chosen route.
Starter	3	Use vocabulary in context.
I do	6	Model four steps before independent work.
We do	7	Operate the shared activity; explain choices.
Check	2	Check a claim against evidence.
Independent	12	Fade content prompts, retain access support.
Review	3	Check and improve one detail.
Exit	3	Hear two individual responses.

Worked model

Question: How can I repair the claim that our tray will stop climate change?

Evidence: No result is supplied. The plan counts new sheets issued for the same task.

Explain: I write: Try approved spare paper for suitable drafts; we will check new-sheet use.

Check: I add the audience, Earth Day date and source. I promise no carbon saving.

Arrival answers

Staff only

Supported

1. 22 April.
2. School users, with a more specific school audience if chosen.
3. No. The supplied evidence gives no carbon saving.
4. On a school-approved classroom device, without online publication.

Standard

1. A small unmeasured action cannot be claimed to stop climate change.
2. Use approved clean spare paper for suitable drafts.
3. New sheets issued for the same repeated task.
4. A claim describes what is true; a request asks someone to act.

Stretch

1. The intention is a proposed result; proof needs suitable evidence afterwards.
2. A named relevant source lets a reader check the actual evidence.
3. Pupil names, faces, personal details and requests for real online accounts or posting.
4. It limits the claim to what the evidence can support.

Checks and assessment

Retain the learner's own response and support record

A small unmeasured action cannot be claimed to stop climate change.

I write: Try approved spare paper for suitable drafts; we will check new-sheet use.

AUTHORED WEAK DRAFT: This will stop climate change | Try approved spare paper for suitable drafts; we will check new-sheet use | The repair proposes a bounded action without promising a global result.

AUTHORED WEAK DRAFT: Our tray has already saved a tonne of CO₂ | We have no measured carbon saving; count new sheets before and during the same task | The repair removes an invented result and names a checkable indicator.

Accept accurate pointing, speech, drawing, typing or writing. Require a named detail and reason where asked. Do not treat a copied model as an independent response.

Record the learner's own reasoning and support used. Keep the conclusion individual and use the exit to plan one next step.

Sources and evidence record

Keep with the teacher copy

Evidence and factual claim record: ../.././Sources_and_checks.html#w04

Exact unit scheme and access text: ../.././Sources_and_checks.html#sow

Authored scenarios and limits: ../.././Sources_and_checks.html#authored

Teacher-supplied book and source checks: ../.././Sources_and_checks.html#book

Full claims, URLs, access dates and reading results: root Sources_and_checks.html. New pictures are authored teaching diagrams. The teacher supplies the school's copy of No One Is Too Small by Greta Thunberg. This pack includes no quotation or extract.

Preparation and source checks

Access support / content prompts / adult note

Accuracy check and next step

Lesson vocabulary

Use these definitions with the lesson and knowledge organiser.

audience — The people a message is intended for

claim — A statement that needs support

evidence — Information used to support a claim

campaign — A planned message asking for a stated action
