Researching the Solar System

Today I can… ☐ I can find a fact on a class source card. ☐ I can name the card that supports my fact. ☐ I can fix a claim that the card does not support.

Staff answers

Source goal: I am learning to… check a source and share a fact about the Solar System.

Weekly line C41: Research and present findings about the Solar System (ICT).

Arrival: Sun. It makes its own light. Earth and the Moon receive light.

Starter 1: Approximately spherical, like a ball. Starter 2: Earth turns on its axis. Starter 3: The Moon. Confirm what was taught before accepting retrieval as a coverage check.

I-do show-me: Card B. It contains the matching Earth-orbit claim.

Sort keys in source order: Sun is a star = Card A. Earth orbits the Sun = Card B. Moon orbits Earth = Card C.

Faded example: the missing source label is C.

Two-option check: The Moon orbits Earth. The Moon is a planet is incorrect.

Researching the Solar System

Today I can… ☐ I can find a fact on a class source card. ☐ I can name the card that supports my fact. ☐ I can fix a claim that the card does not support.

Hinge decisions

Question: Which claim is backed by our class cards?

A. Earth makes its own light. Incorrect: confuses a planet with a star.

B. The Sun is a star. Correct: card A supports the claim.

C. The Moon is a planet. Incorrect: confuses a natural satellite with a planet.

D. Card C says Earth goes round the Sun. Incorrect: chooses a wrong source label for a true fact.

Decision: about three in four secure, move on. If mixed, compare the claims and named card text. If one error dominates, re-model the I-do example. Use a parallel check before moving on. Change response mode if access is the barrier.

Parallel question: Which card backs The Moon goes round Earth: A, B or C? Answer: C.

Misconception: any card supports a true claim. Correction: name the card containing this actual claim.

Source cards are a prepared offline route for the exact research/presentation weekly outcome. Preserve the pupil's individual claim and source evidence.

Researching the Solar System

Today I can… ☐ I can find a fact on a class source card. ☐ I can name the card that supports my fact. ☐ I can fix a claim that the card does not support.

Route answers and access

Supported: one fact with its matching source. Independent: two facts with matching card labels. Aspire: two cards explaining Earth's place and a repaired false label. The task and response mode remain separate.

Valid facts: Sun is a star (A). Earth orbits the Sun (B). Moon orbits Earth (C).

Aspire/deeper model: Earth is a planet around the Sun (B); the Moon goes around Earth (C), so it is Earth's natural satellite, not a planet. Name both sources.

Source-check scenario: class cards are not presented as conflicting facts. The challenge asks what to do if two claims conflict. Check the exact claim against a reliable astronomy source before sharing. A source name alone is not evidence.

No cold calling. A pupil may pass. Read a line the pupil cannot access. Do not require public reading. Accept point, sign, speech, drawing, writing, typing, scribe or staff-captured photo.

Cognition: highlight the matching line and fade it. Communication: rehearse claim and card label or use AAC. SEMH: offer a private source-check role and agreed pause before public share. Sensory: reading ruler or text-to-speech. EAL: home-language planning, diagram and same challenge.

Feedback evidence and staffing

Keep pupil responses separate from adult prompting. Use the five-step ladder in the TA brief and record the deepest step.

At Review give specific VF and an NS+ prompt. Invite // self-edit or ? read-back. Receive the pupil's changed claim or label in their own colour. R requires Voice + Audience + NS+ prompt + pupil response. Do not award R automatically.

Evidence code: SCI-GROW-A2-W03. Keep the original claim, source label, correction and exit response together. For spoken or photographic evidence retain the pupil's own words and the same code.

Agree adult roles before Independent and swap across the week. If only one adult is present, use the actual staffing plan. Offer speech-to-text or text-to-speech on a staff device.

Agree a quiet pause signal and supervised place. On re-entry point to the last completed step. No evidence capture while distressed.

Kit: large prepared source cards and desk mat. Risk: cards could fall onto the floor. Safe: keep them on the mat and pick up fallen cards. Staff check the local risk assessment and exact kit. The optional model is not a claimed core practical.

Coverage and evaluation

Must teach: share two facts, name matching cards, and correct a mismatched claim or label. Retain individual evidence.

If time is short after a secure hinge, reduce repeated oral rehearsal. Record any move of an exit reflection to the next Arrival with its reason and effect on coverage. Keep the safety teaching and core evidence.

Next weekly line: describe causes and effects of global warming and how to reduce our impact. Pass unresolved source-check and hinge errors to the next starter.

Planning bridge: [AWARD] [QUAL]. Present a fact and name a matching source. This is a classroom planning bridge, not a claimed unit outcome.

Curriculum target opportunities: independent source matching; attention and sequencing; turn-taking or agreed response; regulation and re-entry; access and independence; source language rehearsal. EAL is not SEN.

Date taught: _____. Delivered as planned: Yes / Partly / No. Criteria met: All / Most / Some.

Adaptations used and why: _____. Change from scheme, reason and coverage impact: _____. Evidence captured: _____.
