Global warming and choices

Today I can… ☐ I can put cause before effect. ☐ I can say how gases add to warming. ☐ I can compare a cut in emissions with help for an impact.

Teacher and cover plan

1. Outcome
I am learning to… explain a cause and an effect of global warming, then compare two kinds of action. Weekly line C42: Describe causes and effects of global warming and how to reduce our impact.

2. Arrival
Sort weather today and climate over many years. Point to the long-term idea.

3. Starter
Solar System fact and card; why a place has night; friction and motion. Check actual prior coverage.

4. I do
Model fuel → carbon dioxide → slower heat loss → warming/heat risk. Teach four words and show-me check.

5. We do
Complete and sort four chain cards. Predict and make the real timed ice observation. Then step check and four-option depot hinge.

6. You do
Build a cause-to-impact chain; compare an emissions cut and help for an impact, with reasons.

7. Routes
Supported orders cause/effect; Independent explains two links; Aspire compares action types. Both council challenges remain open.

8. Access
Pupil may pass. Read/scribe exact words; use agreed modes and home-language planning. No personal consumption/travel disclosure.

9. TA role
Held five-step ladder plus source-specific cues. Record deepest prompt separately. Use actual staffing plan.

10. Exit
Hear cause/effect/action and changed link. Receive revised reasoning and name next teaching/support.

11. Evaluation
Delivered: Yes / Partly / No. Adaptations, reason and effect: _____.

Global warming and choices

Today I can… ☐ I can put cause before effect. ☐ I can say how gases add to warming. ☐ I can compare a cut in emissions with help for an impact.

Teacher and cover plan continued

12. Kit safety evidence and timing

Kit: chain cards, source diagram, pupil books and writing tools. Real observation: two equal ice pieces, two trays, dark card, light card, staff clock.

Safety: ice stays in trays; wipe spills. No heater or heat source. Check school risk assessment and [SYS] guidance. Same light and one set observation time; record actual Start/Later observations. This surface observation is not proof or a model of the greenhouse effect.

Evidence: cause-to-impact chain, comparison and reasons, real observation/result table or labelled explanation, review edit and exit response. Code SCI-GROW-A2-W04. Keep individual evidence and prompt level separate.

Stage timings

0–5 min · Arrival

5–8 min · Starter

8–13 min · I do

13–20 min · We do

20–25 min · We do 2

25–33 min · Independent

33–37 min · Review and improve

37–40 min · Exit
