Arrival · Aspire

I can make a claim that answers the question.

I can add relevant evidence and a scientific reason.

I can keep my first answer and make one pupil-owned improvement.

Use your book. Point, say, sign, draw, type, write or use an exact scribe. You may pass. Keep your first answer.

Recap: link question, evidence and reason. A claim must stay within what was measured. A model can help while leaving things out.

1. Distinguish clarification from an adult rewriting the answer.
2. Explain why more words do not always mean stronger evidence.
3. Name one fair limitation of the rover data.
4. State when a pupil might justify no change after audience response.

I can make a claim that answers the question.

I can add relevant evidence and a scientific reason.

I can keep my first answer and make one pupil-owned improvement.

Use your book. Point, say, sign, draw, type, write or use an exact scribe. You may pass. Keep your first answer.

Choose one embedded question—rover friction, day and night, or extra greenhouse gas and warming—give a first answer, have it received by an adult, then revise or justify keeping it.

Answer a second topic question. Which evidence is stronger, and why? Explain why you changed your answer or kept it.

Add one limitation without weakening a secure conclusion.

No forced public speaking or recording. Use an audience of one, pointing, quiet handover or exact adult scribing.

Choose one route within the full 15 minutes. Use paper, cards or an offline document. Nothing is uploaded.

First answer and next answer

I can make a claim that answers the question.

I can add relevant evidence and a scientific reason.

I can keep my first answer and make one pupil-owned improvement.

Choose rover friction, day and night, or extra greenhouse gas and warming. Keep each part of your own response.

First answer	Next answer or justified no change
_____	_____
_____	_____

My evidence or model clue: _____

What the adult heard or saw: _____

My next move and why: _____

Keep the first answer beside the next. The adult may write your exact words. You own the choice to change or keep them.

I can make a claim that answers the question.

I can add relevant evidence and a scientific reason.

I can keep my first answer and make one pupil-owned improvement.

Justify a change or no-change decision using relevance, evidence and limitation.

Show or say your own response. The adult names back the science they heard or saw. Then choose a next move.

Secure / mixed / misconception / access / method or evidence.

What I said, and what it changed: _____

Next I will: _____

Use your book. Point, say, sign, draw, type, write or use an exact scribe. You may pass. Keep your first answer.
