

# Our sustainability decision report

*Pupil resources | LAUNCH Humanities Summer 1 Week 6*

Complete a sustainability decision report.

---

Authored teaching picture

Use the evidence cards and blank spaces to give your own response. Speak, point, draw, type or write.

Start here: a decision uses criteria and evidence. Cards A to D restate the options, scoring method and report requirements; earlier work is optional.

# Evidence cards

*Check the source and limit before using a detail*

## **A Explicit decision criteria**

AUTHORED options: A uses spare paper before new sheets for suitable drafts. Assume teacher permission and a daily checker; it does not suit every task. B proposes an accessible cool break space for hot weather. It needs adult assessment and permission before use; no result is measured. Compare resource benefit, access and feasibility. Score each criterion 1 for weak support, 2 for some support or 3 for clear support, with an evidence note.

Source: Authored decision-scoring framework, 21 September 2026

Limit: Scores are judgements supported by evidence, not measured environmental savings or an examination grade.

## **B Evidence available**

The NOAA table records CO<sub>2</sub> concentration. NASA explains the climate link and response types. The school options and 12-to-8 sheet comparison are AUTHORED PRACTICE. A real school decision needs the teacher's checked local evidence as well.

Source: NOAA GML; NASA Causes and Mitigation and Adaptation; authored practice record

Limit: A global climate source cannot establish a particular school action's result.

## **C Explain the preferred option**

State your priority and preferred option. Give criterion scores with evidence, a trade-off, an evidence limit and a realistic next action. A higher total informs a decision but does not remove the need to explain who can use the option.

Source: Authored report framework, 21 September 2026

Limit: Different priorities can lead to different justified decisions. Nobody must disclose a family or personal view.

## **D Keep the report your own**

Check figures, units, sources and whether a claim is observed, inferred or proposed. Record the access support and any content prompts used. An adult may faithfully record your spoken response with a date. Select the report and supporting grid as evidence.

Source: Authored evidence-retention checklist

Limit: Do not copy the shared model as your independent conclusion. No qualification code or award is assigned.

# Arrival task

*Supported*

Start here: a decision uses criteria and evidence. Cards A to D restate the options, scoring method and report requirements; earlier work is optional.

## **1 Name one report criterion.**

Help: Read card A.

**My response**

---

## **2 What must support a score?**

Help: Read the scoring rule.

**My response**

---

## **3 What is a trade-off?**

Help: Use the glossary.

**My response**

---

## **4 What should be recorded about help?**

Help: Read card D.

**My response**

---

# Arrival task

*Standard*

Start here: a decision uses criteria and evidence. Cards A to D restate the options, scoring method and report requirements; earlier work is optional.

## **1 What five elements should the report explain?**

Help: Read card C.

**My response**

---

## **2 Are the scenario scores environmental measurements?**

Help: Check card A's limit.

**My response**

---

## **3 Can NOAA prove a paper-tray saving?**

Help: Compare the quantities and coverage.

**My response**

---

## **4 Why record a realistic next action?**

Help: Consider an evidence gap.

**My response**

---

# Arrival task

*Stretch*

Start here: a decision uses criteria and evidence. Cards A to D restate the options, scoring method and report requirements; earlier work is optional.

## **1 Why might a higher total not settle a decision?**

Help: Consider access and priorities.

**My response**

---

## **2 How could you test sensitivity to an assumption?**

Help: Change one reasoned score.

**My response**

---

## **3 What makes a report independent?**

Help: Distinguish access from supplied answers.

**My response**

---

## **4 What evidence might justify revising the report?**

Help: Name a local check.

**My response**

---

# Shared investigation

*Use the evidence; explain and check together*

1. Score the two authored options against resource benefit, access and feasibility. Require an evidence note for each 1-to-3 judgement.
2. Preview a practice report selection in the portfolio. Check preferred option, trade-offs, limits and next action before independent reports.

Score each criterion: 1 = weak support; 2 = some support; 3 = clear support. Give evidence for every judgement. These are decision criteria, not grades.

| Criterion        | Option A: score + evidence | Option B: score + evidence |
|------------------|----------------------------|----------------------------|
| Resource benefit |                            |                            |
| Access           |                            |                            |
| Feasibility      |                            |                            |

**Preferred option and trade-off**

---

**Limitation and realistic next action**

---

**Support used / adult note**

---

# Independent task

*Supported*

Complete a sustainability decision report.

1. Use both option cards and score resource benefit, access and feasibility with the frame.
2. Write a report naming your preferred option, one evidence detail and a trade-off.
3. Independently give a limitation and next action; record support or an adult note.

Help: Use highlighted evidence and the frame. An adult may read or scribe your own words.

## **Criterion scores and evidence**

---

### **Preferred option and trade-offs**

---

### **Limitations and realistic next action**

---

### **Accuracy check and support recorded**

---

Further challenge: Explain a second detail if ready.

# Independent task

## *Standard*

Complete a sustainability decision report.

1. Score both options against the three stated criteria and justify each score.
2. Write the report with preferred option, evidence, trade-offs, limitations and next action.
3. Independently check the report against unit success criteria and retain the support record.

Help: Use the cards and organiser. Choose your own evidence and explanation.

### **Criterion scores and evidence**

---

### **Preferred option and trade-offs**

---

### **Limitations and realistic next action**

---

### **Accuracy check and support recorded**

---

Further challenge: Compare your reasoning with one alternative.

# Independent task

## *Stretch*

Complete a sustainability decision report.

1. Audit the criteria and explain any extra priority before scoring both options.
2. Test how one changed assumption might alter the preference.
3. Write a report weighing the alternative fairly with evidence limits and a realistic next action.
4. Independently justify the final decision and record what stronger evidence could change it.

Help: Use the source limits and test a different priority or assumption.

### **Criterion scores and evidence**

---

### **Preferred option and trade-offs**

---

### **Limitations and realistic next action**

---

### **Accuracy check and support recorded**

---

Further challenge: Propose a further evidence check and explain its value.

# Exit tickets

*Use your chosen route and give your own response*

## Supported

1. State your preferred option and one reason. Use a named detail and your own explanation.

---

2. Give a limit and next action. Use a named detail and your own explanation.

---

## Standard

1. Explain your decision using criterion scores and evidence. Use a named detail and your own explanation.

---

2. What trade-off and limitation have you retained? Use a named detail and your own explanation.

---

## Stretch

1. Why does your final judgement remain defensible? Use a named detail and your own explanation.

---

2. What evidence could change it and what support was used? Use a named detail and your own explanation.

---
