

Our school route fieldwork

Knowledge organiser | GROW Humanities

Carry out simple fieldwork about my local area.

Words to use

Word	Meaning
enquiry	A question we investigate
tally	A mark used to count an observation
land use	What an area or feature is used for
method	The steps used to collect evidence

Method to remember

Agree the enquiry, roles, route and counting rule.

Use paper tallies. Label the location and keep points separate.

Return together, check totals, then plot indoors.

Label practice data clearly and replace it with real class counts.

My explanation

At ____ we counted ____ features used for _____. We used _____. This cannot show _____.

Remember

Count features, not land area. No device is needed outdoors. The adult checks and supervises the route.
