Independent route

Year A | Autumn 2 · Week 1 | 3 November 2026

I can create two named score variables in my maze project and set both to zero on start.

1. Choose card A or B and plan your two variables.
2. Create one pickup variable and one hazard variable.
3. Attach two set-to-zero blocks under the start event.
4. Place both stage readouts clear of the maze walls.
5. Test the start reset from a non-zero number with a partner.
6. Save, close and reopen the file. Check the script.

Check my work

[ ] I created two named score variables.

[ ] I set both score variables to zero on start.

[ ] I placed both readouts clear of the maze path.

[ ] I tested the start reset from a non-zero value.

[ ] I reopened my saved file and checked the script.

One choice that makes the start fair

You may point, speak, build or ask for exact scribing. Each person keeps their own project file and check.
