Staff answers

Reflection guidance and invented examples, not learner observations.

Exact weekly outcome

Work-experience reflection.

Four reflection parts

What I did: actual task/role with work reference. What I learned: a specific insight supported by an example. What I would do differently: a useful change and help. Which expectations I met: link to actual behaviour/work and keep a gap visible. Accept voice, pointing, aid, exact scribe or typing. Do not require a long account or personal work history.

Model and keys

Invented example only, not learner evidence. A worker read a step and checked one paper pack. The second pack still needed checking. Checking each pack against the order shows what is actually ready. Next time the worker will check or ask for help before calling the whole order complete. Instructions and quality: one actual check. Asking for help with the next check is a planned next step, not yet observed evidence for Safety and help. Do not claim both packs were complete.

CfU key: only one pack was checked; second remains pending. Only Instructions and quality has the stated observed check. Asking help is an intended next step, not evidence the worker already asked. Main B links an actual check, gap and next step rather than claiming perfect completion. Parallel A uses actual work/date/mode or records a gap, rather than copying the invented model as own experience. Re-model and recheck privately; pass unobserved.

Evidence boundaries

Use the actual half-term workplace activity: the invented classroom simulation, or a real placement if one happened. Record actual activity date, task, role, mode and work reference. No employer, person or place names. Do not invent a placement or completed task. If no activity was completed, mark that and agree a supported follow-up; do not use a model as your own evidence.

Teacher assessment and learner review

Six outcome grid

Teacher only: six exact weekly outcomes, each with an initially blank tick cell and comment cell. Tick only when actual evidence supports the outcome. Comment with a work reference, support used and any gap or follow-up. An unticked outcome is not proof of failure. Keep learner self-assessment separate; never prefill the learner ratings.

Week	Exact weekly outcome
1	Workplace expectations & behaviours.
2	Health & safety at work.
3	Experiencing work: placement/simulation.
4	Following instructions & teamwork.
5	Customer service skills.
6	Work-experience reflection.

Evidence Sheet page 4 is the teacher-only blank tick-and-comment grid. Review the saved item from each week where available. A tick needs actual support for that outcome, not mere attendance or a folder being present. Comments record reference, support, gaps and follow-up. Do not compel all ticks or treat an unticked row as proof of failure.

Own five expectation ratings

Learner ratings are separate: I did this; I did this with a prompt; I need another try; Not seen today. All five learner rating and evidence cells start blank. Ask privately for a clue if needed, keep the first rating and any revision, and record supplied thinking. Normal aids are access. Do not copy a teacher judgement into a learner self-rating.

Assessing week timing

23–35 the learner creates the four-part reflection. 35–38 five own ratings; 38–40 next step/reply and save. Teacher completes or finishes the six-outcome review during or after the lesson from actual work, not by rushing the learner through six new tests.

Access feedback and follow up

Tiers

Supported chooses one actual item with four prompts, model and frames. Standard uses specific examples and explains a gap. Stretch compares two pieces/points, what changed/helped and a limit of evidence to justify an adjustment. All keep the four parts, five own ratings and honest gaps. More writing is optional.

Access and private help

Usual reading/communication aid, voice, pointing, typing, exact scribe/readback and private adult review. Plan in any language. Pass, pause and supported return. Do not remove aids, force public presentation or ask for personal employment history. Listen calmly to concerns, avoid probing or secrecy promises and follow school procedures; keep concerns outside shared evidence.

Feedback and judgement

Judge evidence-linked reflection and a useful future adjustment. A missing item or unobserved role has a supported follow-up, not an invented answer. No personality, fluency, speed or attendance score. Retain first try, one NS and reply. E actual saved work; R after Voice, Audience, NS and reply in the same colour, on the same page or usual mode. Offer to Communication portfolio; staff confirm accredited mapping. Do not infer whole-workplace competence or real placement attendance from classroom work.

Source and scope

B93/C93 and six weekly outcomes C88–C93 exact. Friday 12 February 2027 P1, pair, forty minutes; assessing week. This closes Spring 1 Week 6. No later queue authored. Pause for Downloaded; further GROW Careers remains paused.
