Teacher and cover guide

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026 · 40 minutes

Keep four even beats

I can keep a steady beat and leave a quiet rest.

Practice for the Week 2 outcome. Observe each pupil keeping four even beat spaces, including rests. Keep only a real record of the pupil's attempt. This lesson alone does not complete the award.

Success: I can leave the same gap from beat to beat. I can keep a rest quiet for one whole beat. I can start and stop with a cue.

Timed flow

Minutes	Stage	Teacher action
0–5	Arrival	Choose a quiet movement, teach STOP and retrieve four numbered spaces.
5–8	Starter	Compare A and B. Find the quiet rests in B; both parts last four even beats.
8–14	I do	Use the 60-second model; rehearse count-in, pulse and full rests; check after modelling.
14–22	We do	Play A together for four minutes; play B and use the hinge for four minutes.
22–37	You do	22–28 choose and practise one route; 28–34 try, receive one next step and retry; 34–37 record, check and tidy.
37–40	Exit	Each pupil shows one attempt or explains a rest; record actual support.

Learning and evidence

Week 2 builds steady pulse from the previous sound exploration. Use four beat positions and original class parts so the task is reproducible with quiet body percussion. Observe the pupil, not just the whole group. At A page 1 record the real method, prompt, one success and one next step. This is practice evidence for the award; do not prefill a part outcome or treat attendance as skill evidence.

Give one next step. Respond in the same colour, on the same page or usual mode. Record R only after Voice and Audience are present, one NS is set, and the pupil responds.

Kit and room set up

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

Quantities support five learners plus an adult model.

Item	Quantity
Numbered four-beat strips	6 strips; 5 pupil copies and 1 large model
TAP and REST cards	24 of each word or symbol, with words printed
Soft tapping spaces	6 mats or clear soft surfaces
Pencils and blank response slips	6 pencils; 5 slips with unfilled pupil code fields
Visual steps and word pages	5 of each, plus 1 adult model
Original class part cards A and B	6 sets; A = TAP TAP TAP TAP; B = TAP REST TAP REST
Agreed stop cue card	1 large red STOP card with a flat-hand sign
Quiet response choices	5 visible nod, point or finger-tap choices
Observation record	1 blank record with space for each actual attempt

Before the lesson

Place four numbered spaces where every pupil can see them. Check the soft tapping option and agree the flat-hand STOP cue. Keep the room quiet. Use a pair and a trio; rotate beat keeper, player and watcher. Give each pupil a strip and a personal response record. Model with original class parts only. Do not use commercial music or external media.

Save and tidy

At 34 minutes, invite each pupil to try B once and choose one next step. Record the actual timing and prompt used. Ask the pupil to check the scribed comment. Return cards and mats; leave the next part strip ready for the second lesson. Put the selected pupil record at A page 1.

Access and group care

You can tap, point, sign, nod or use a quiet hand move. Ask for less sound or a pause. Use your usual way to show what you know. Agree a quiet volume and a clear stop signal. Offer silent beat tracking. Do not require personal disclosure, recording or a public performance.

Demonstration and planned support

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

The demonstration is an original teaching model. It is not a pupil record.

0–15 seconds Watch

Point to four numbered spaces. Give four slow, even counts without playing. Say: “This is the count-in. We start on the next one.”

15–30 seconds Tap

Play A: TAP, TAP, TAP, TAP. Move the pointer through spaces 1–4 at the same rate. Say: “One tap in each space. My gaps stay the same.”

30–45 seconds Rest

Play B: TAP, REST, TAP, REST. Keep the pointer moving through all four spaces. Say: “A rest is quiet. Beat two still takes one full space.”

45–60 seconds Check

Repeat B twice after a fresh four-count. Show the raised-hand stop cue. Say: “I keep the spaces even. I stop at the cue.” Let a pupil show beat two without a sound.

Planned adaptations

Cognition: Use four large numbered spaces. Show one step, repeat, then fade the pointer.

Communication: Pair each word with a gesture. Accept sign, point or speech. Give wait time.

Semh: Predictable start and stop; quiet sound; partner practice; pause and rejoin at a new count-in.

Sensory: Soft finger tap, nod or pointer. Position the strip within sight and reach. Sound is optional.

Eal: Plan in any language. Use the same word, symbol and action. Invite a short stem or demonstration.

Five a day: Explicit instruction: model a four-beat part and say the thinking aloud.; Scaffolding: number four spaces and point to the first beat, then fade the help.; Cognitive and metacognitive strategies: count, try, check the gaps and choose one change.; Flexible grouping: use a pair and a trio, then swap roles without changing the learning goal.; Technology: use an optional work-only replay if already available; live observation gives the same access and no recording is required.

Speaking frames: I keep the beat by ___. At REST I ___. My taps were ___.

Check and respond

Autumn 2 · Week 2 · Lesson 1 · Monday 9 November 2026

Common mistake	What to do
The pupil speeds up after a rest	Keep the pointer moving through every numbered space. Say “tap, wait, tap, wait” at one pace. Practise B with a visible nod for every beat, then fade the nod.
The pupil skips a rest and starts the next tap early	Point to beat two and count its full length. Contrast TAP REST TAP REST with TAP TAP. Both rests need a place. Return to four even taps, then put the rests back.
A louder tap is treated as a better beat	Use soft taps or silent movements at the same pace. Praise timing, not loudness. Return to the agreed low sound level and stop cue.

Checks and decision

Cfu: After I do, point to beat two in B. Ask: “Tap or quiet?” Each pupil shows quiet, then points to beat three on the next beat. If the pupil skips straight to three, repeat a slow model with a pointer.

Hinge: At We do 2, show B: TAP REST TAP REST. Ask: “Does beat two still take time?” Choose A: no time, or B: one full quiet beat. Correct B. If every pupil shows B and keeps one full quiet beat, move to route practice. If any pupil skips the rest, model four even spaces again and retest that pupil before independent playing.

Hinge parallel: Retest with REST TAP REST TAP. Ask: “What happens on beat one?” Correct: a full quiet beat; play on two. Check with a visible pointer rather than a verbal guess alone.

Hinge decision: All correct in choice and timed action: move on and fade one cue. Any error: remap four even spaces, model once, retest that pupil.

Questions with thinking time

F: Point to REST. Show quiet.

M: Show where the next tap comes after beat two.

H: Explain why two taps can still take four beats. Invite a private or paired response first.

Evidence and response

How do you keep the beat when the part is quiet?

A_Take_Part.pdf · page 1. Give one next step. Respond in the same colour, on the same page or usual mode. Record R only after Voice and Audience are present, one NS is set, and the pupil responds.
